COVID-19 TESTING

End-to-End Customized Solution

We recognize everyone's COVID-19 situation is unique, which is why we wanted to provide you with a list of customizable steps in our COVID-19 testing program to fit your needs.

TEST ORDERING

- COVID-19 Tests** – option to order both the molecular and antibody test together or individually depending on your testing needs.

SPECIMEN COLLECTION

- Specimen Collection Kits** – we provide nasal swabs and blood collection kits for molecular and serology testing, respectively.
- Mobile Specimen Collection** – we can facilitate scheduling a healthcare provider to perform centralized specimen collection as needed.

SHIPPING

- Scheduled Courier Pick-Up (Colorado & Kansas)** – we can ensure same-day specimen pick-up with scheduled local couriers.
- FedEx Overnight Shipping (US)** – we use FedEx for overnight shipment of specimens to the Biodesix laboratory.
- Open All Week** – we accept specimens for testing 7-days per week to ensure we deliver results as soon as possible.

RESULT REPORTING

- Individual & Batch Test Reporting** – we offer two options for test result reporting that are HIPAA compliant.
- COVID-19 Demographic Report** – we can provide a demographic coversheet for a snapshot of the impact to your organization.

BILLING

- Biodesix is able to bill you, except as required by State or Federal regulations, or the patient's insurance for COVID-19 testing.
