

## Platelia SARS-CoV-2 Total Antibody Test Result Report

Report Date: «Test\_Report\_Date»

Ordering Site: «Shipping\_Origin»

Biodesix Test Number: «Accession\_Number»

Sample Type: «Specimen\_Type»

Date of Blood Draw: «Specimen\_Collection\_Date»

### TEST RESULT

Patient Name: «Patient\_First\_Name» «Patient\_First\_Name»

Date of Birth: «Patient\_Date\_of\_Birth»

Platelia SARS-CoV-2 Total Antibody Test Result<sup>1</sup>: «Test\_Result»

### RESULTS INTERPRETATION<sup>2</sup>

#### What is the Platelia SARS-CoV-2 Total Ab test?

The Platelia SARS-CoV-2 Total Ab test is designed to detect antibodies in a blood sample that would indicate that you may have current or prior COVID-19 infection.

#### What does it mean if I have a positive test result?

If you have a positive test result, it is likely that you have or previously had COVID-19 and that you have developed an antibody response to the virus. Your healthcare provider will work with you to determine how best to care for you based on the test results along with other factors of your medical history, including any previous symptoms, possible exposure to COVID-19, and the location of places you have recently traveled. There is also the chance that this test can give a positive result that is wrong (a false positive result).

#### What does it mean if I have a negative test result?

A negative test result means that the antibodies to the virus that causes COVID-19 were not found in your sample. However, it is possible for this test to give a negative result that is incorrect (false negative) in some people with COVID-19 infection. A negative result may occur if you are tested early in your illness and your body hasn't had time to produce antibodies to infection. If this is the case, your healthcare provider will consider the test result together with all other aspects of your medical history (such as symptoms, possible exposures, and geographical location of places you have recently traveled) in deciding how to care for you.

It is important that you work with your healthcare provider to help you understand the next steps you should take.

<sup>1</sup> The test has been validated but FDA's independent review of this validation is pending.
