INTELLIGENT DOCUMENT PROCESSING (IDP)

IDP is highly flexible and can be trained to read any type of document, including invoices, receipts, bank forms, utility bills, contracts, shipping documents, etc.

IDP automatically scans printed documents and transforms both printed and electronic documents into digital transactions, reducing employee workload and time spent on data entry.

IDP automates the creation of iRely transactions such as vouchers, contracts, shipping documents, etc.

- Data is extracted from a document and converted to fields and tables
- It can be trained to read any type of document
  - Structured (everything is at an absolute location)
  - Unstructured (cannot predict where information will be on a page or what page it will be on)
  - Semi-structured (a mix of structured and unstructured data)

IDP is a combination of several technologies

- **Optical Character Recognition (OCR)**
  - Recognizes and extracts characters from documents (printed, scanned, PDF, etc.)
  - Converts those characters into a machine-readable format
  - Can be 95% accurate depending on the condition of the document
- **Artificial Intelligence (AI)**
  - Identifies relevant sections for extraction and classifies documents
  - Discerns differences between "I" and "1" by using context
- **Machine Learning (ML)**
  - Improves decision making over time
  - Learns the difference between A1 and AI
  - Leverages data gathered from other similar forms in other businesses

INTELLIGENT DOCUMENT PROCESSING (IDP)

Our Promise to You

- We will refund your money if the company is sold

- There are no hidden costs. Our BPR will ensure you know the true cost of the software upfront

- Our software will last at least 10 years with easy to implement upgrades along the way

- Our implementation success rate is 100%

About iRely

iRely's commitment to customer success has made the company a global leader in digital transformation, providing best-in-class software for commodity management, petroleum distribution, retail, grain operations, and agribusinesses. Headquartered in Fort Wayne, Indiana, with offices in Chicago, New Jersey, Texas, California, London, Bangalore (India) and Makati City (Philippines), iRely has nearly 40 years of experience delivering end-to-end enterprise resource planning (ERP) and commodity trading and risk management (CTRM) solutions to simplify complex business processes through a single point of truth. iRely has leveraged its deep industry experience and expertise to build genuine, lasting partnerships with over 500 customers in more than 25 countries.
