

Networking

Residential Network (ResNet) Infrastructure

Build with Your SUNY in Mind

A typical college student today brings eight or nine wireless devices to their college residence hall—whereas a few years ago that number may have been more like two or three. This trend is rising semester after semester; WiFi and Content Programming are no longer a “nice to have” but are critical components to remaining competitive and ensuring a positive student experience. We take a holistic approach to designing high-performing, reliable and stable networks with the ability to handle the growing number of connected devices from students coming and going on campus.

Your Students Will Feel Right at Home

ComSource’s team of ResNet experts will design, implement, and manage the support of your investment offloading your Campus IT team to focus on your strategic IT initiatives while ensuring you’re meeting student connectivity demands.

- Evaluate your dormitory building(s) and property for coverage, access, and traffic flow.
- Design a customized ResNet solution package, including; hardware and software, Internet bandwidth, WiFi access points, and digital and cable TV services.
- End-to-end installation and configuration, including; physical installation, cabling, testing, documentation and training.
- 24/7 Support of end users to ensure connectivity and performance issues don’t hinder the guest experience.

Turn Possibility into Reality

ComSource delivers technology solutions coupled with financial strategies to bring your University’s vision to life.

As an IT solutions provider, we don’t manufacture technology, we harness it. Acting as your technology advocate, we’re the people behind the technology, designing for you and working with you. With trust, loyalty, and relationships as the cornerstone of our business for over 30 years, let us help you redefine what’s possible.

Customize Your Campus

Managed Wired & Wireless Networking Solution & Services

Offload your connectivity for the students to ComSource, get the infrastructure your College needs to perform at the highest levels, including the network switches, access points, firewalls and ongoing management and maintenance with this managed services, including:

- Turnkey infrastructure, configuration, and support services for the duration of the agreement
- All remote support provided by the ComSource partner network (24x7) with a Service Level Agreement, including management of lifetime code updates on equipment (active license and service required)
- Direct student support including dedicated toll free number and email
- Management dashboard, where your campus can monitor your usage.
- Heighten security with built-in anti-virus scanning technology inside the Access Points, and a listing of free AV/anti-malware tools for your students to use.

Digital or Cable TV Service

Eliminate additional television maintenance and cost and deliver a better service for the students with DirecTV service for your college. This service will provide an increased channel line-up for your students with better quality output with a 76 channel DirecTV High Definition Rack. Expand the line up or change the channels being offered quite easily to meet the needs of the students.

Internet Bandwidth

When's the last time you took a good look at your invoices and utility bills for ResLife? Let ComSource review your current Internet service expenses and get your campus the best deals in your area. With ResNet services from ComSource, we'll:

1. evaluate your current network design, focusing on how effectively your business utilizes Internet services,
2. compare your current vendor services with other available offerings, and
3. recommend alternatives to reduce overall network costs and improve performance of your new, dedicated residential network.
