

Commvault Services

Industry-leading Data Protection software designed and delivered by the experts.

Turn Possibility into Reality

ComSource delivers technology solutions coupled with financial strategies to bring your institution's vision to life.

As an IT solutions provider, we don't manufacture technology, we harness it. Acting as your technology advocate, we're the people behind the technology, designing for you and working with you. With trust, loyalty, and relationships as the cornerstone of our business for over 30 years, let us help you redefine what's possible.

Start Today

A modern backup and recovery strategy should account for the impact of the continued exponential growth of data, applications, hyperconvergence, migration to the cloud, digital transformation strategies, and even a new wave of external threats. Through our partnership with Commvault, we help address these dynamic complexities and help your organization define a clear data protection strategy that will enable your business to do more with your data.

ComSource's team of Commvault experts includes "Master Certified" technicians who can design and deploy the Commvault software with complementary hardware and services to deliver value from day one:

- Support for files, applications, databases and hypervisors across on-premises, public and private cloud storage.
- Multi-cloud strategies, single view of on-premise and cloud data
- Data migration with built-in compression, deduplication and encryption
- Ransomware protection, eDiscovery, GDPR compliance
- Automation & orchestration from provisioning to validation, workload-based rules and provisioning

**COMMVAULT®

PARTNER**

MARKETBUILDER

Data Protection that Makes More Possible

Backup & Recovery

ComSource takes a holistic approach to helping customers with Data Protection – which means we don't stop at the software. After a comprehensive review of your data, applications, databases and virtual environment - we take the extra step of ensuring the industry-leading Commvault platform is supported by the compute, storage and networking infrastructure your business needs.

Cloud

To whatever extent your organization is leveraging Cloud strategies, ComSource can help you leverage Commvault for a better data management experience. With cross-platform data migration capabilities, and native integrations with almost any provider, we'll show you how Commvault can provide a single, comprehensive view of your data with the ability to move data to, in and throughout your Cloud environments.

Implementation & Testing

ComSource's expertise in designing bespoke Commvault architectures is complemented by our professional services delivery. We take a hands-on approach to working with our customers throughout the implementation process for maximum knowledge transfer. Often, we participate in our customers' Disaster Recovery tests to ensure end users are comfortable, and capable, with the entire workflow – including management debriefs and writing policies & documentation to ensure best practices are in place.

Archive & Reporting

With Commvault, the days of relying on separate tools to solve data protection, archiving and reporting needs are long gone. ComSource will show you how to eliminate data silos and management headaches by using Commvault's integrated, common infrastructure for reporting and advanced analytics that will support eDiscovery, regulatory compliance and other business needs.

ComSource

Turning **Possibility** into Reality

ComSource delivers technology solutions coupled with financial strategies to bring your vision to life.
