

# How MIRUM<sup>®</sup> Is Made

## 1 Start with All Natural Ingredients

All natural materials such as cork, coconut husk, rice hull, natural rubber, vegetable oils, and minerals determine the aesthetic and performance characteristics of each MIRUM product.

Fibers and Fillers

Natural Rubber

Structural Colorant

NFW's patented plant-based curative

## 2 Mix & Form

During mechanical processing, ingredients are combined and shaped into sheets.

Finished MIRUM can be added back into the ingredient mixture

## 3 Finish & Cure

Thick or thin? Matte or glossy? Traditional leather-like appearance or unexpected patterns and textures? MIRUM is a designer's dream. The addition of an optional fabric backer (no plastic required!) provides added structure and functionality for product applications.

Backing (Optional)

Unfinished MIRUM

Apply Texture
