

The Ultra Annular

Applications:

- ✓ High-temperature drilling applications, including geothermal
- ✓ Meets or exceeds OEM requirements
- ✓ Fits in industry-available annular style BOPs, no modifications required

Benefits:

- ✓ Proprietary design incorporating lower extrusion gaps, resulting in improved temperature performance versus competitive design (Patent: US2017 0145770 A1)
- ✓ Manufactured and tested in our Q1 and API-16A accredited facility
- ✓ Utilizes FOGT proprietary material NBR 162
- ✓ Improved performance in elevated temperature conditions; tested under API-16A 4th ed. high temperature testing procedures up to 350°F (177°C) and low temperature procedures at or below 40°F (4°C)

**Proprietary design
certified up to 350°F**

350 °F (177°C)

**NBR
162**
