

ALM Process Automation

Accelerate Innovation With Automated ALM Workflows

As software teams grow, the processes for requirements, coding, testing, and release management become complex with disparate tools hindering visibility and control. Keeping various artifacts updated and synchronized, and ensuring everyone is on the same page around what is being built becomes challenging. The scattered artifacts not only hinder transparency but also affect integrity and compliance. As a result, software development teams are not aligned with business goals and the product development lingers indefinitely, leading to cost overruns.

Boost Collaboration and Efficiency With No-Code [ALM Automation](#)

Klera offers out-of-the-box, no-code apps to automate your ALM workflows. You can integrate various ALM tools to unify product backlog, get early warnings for project deviation, streamline project management, and more.

ALM Automation Apps

Unified Product Backlog

The application helps you automatically synchronize data from multiple ALM tools to create a single source of truth. With a unified view, you can prioritize mission-critical work-items while assessing their impact on other features, availability, and customer experience.

Early Warning System

Get data-driven early warnings for deviations along with ML-based delivery predictions for enabling timely and high-quality deliveries. The app visualizes critical metrics and helps you analyze scope variance, sprint velocity, and other issues affecting delivery schedules.

Project Management

Streamline project management with automated workflows that help you assess the true health and performance of your development initiatives. Gather data across different stages and collaborate with key stakeholders to plan releases and allocate resources better.

Get Started in Minutes

Klera offers out-of-the-box apps for ALM automation and also provides a powerful no-code app builder framework, which helps you modify these apps or develop new ones from scratch, within minutes.

Explore all Possibilities

Data Integration

Use out-of-the-box, bi-directional smart connectors to automatically collect data and metrics from disparate ALM tools and processes.

Actionable Intelligence

Leverage built-in computation engine or apply custom formulas with Python and Machine Learning to correlate data and derive actionable insights.

Unified Monitoring

Enhance process visibility with pre-built monitoring templates and dashboards providing coordinated views to analyze complex, correlated information.

Alerts and Actions

Set up event and threshold-based alerts and trigger automated actions and schedules on meeting predefined conditions.

Compliance Reporting

Generate and send compliance or routine internal audit reports via email to all stakeholders automatically.

Klera

Klera™ is a software products and services company focused on creating solutions that deliver intelligence from data, unlike ever before. We enable transparent, collaborative, and connected enterprises, without data silos. Our rapid, no code, intelligent application development platform simplifies how you gather, analyze, and synchronize data.
