

# Finance Process Automation

## Automate Finance to Drive Greater Efficiency, Compliance, and Productivity

Despite the ubiquitous digital transformation, accounting and financial process management still involve rigorous manual work and attention to detail. These processes become more complex in multinational organizations, where financial standards and compliance vary from one country to another. It's not easy to ensure data accuracy across thousands of spreadsheets maintained by different stakeholders. At times, there's a need to refer to emails and other disparate tools to update data. As a result, finance teams are often stressed and overworked.

## Automate Routines and Get 360-Degree Data-Driven Visibility

Klera helps you automate finance operations with data-driven planning, budget and revenue forecasting, contract management, accounts payable and receivables management, and more.

## End-to-End Finance Automation

### Accounts Payable and Receivables Management

Automate payments, invoicing, credit notes, and more with a complete audit trail and visibility using a unified dashboard for accounts payables & receivables.

### Quote to Cash

Get no-code integration across Billing, CRM, CPQ, and ERP systems, automate approvals to reduce back and forth between sales and finance and accelerate sales cycles.

### Budget and Revenue Forecasting

Analyze cash flows, debts, revenues, and expenses with automated data integration and visualization, and use machine learning to enhance budget and revenue forecasts.

# Get Started in Minutes

Klera offers out-of-the-box apps for finance automation and also provides a powerful no-code app builder framework, which helps you modify these apps or develop new ones from scratch, within minutes.

## Explore all Possibilities

### Enhanced Data Integrity

Connect and sync data across all tools, financial databases, and spreadsheets using bi-directional smart connectors.

### Dynamic Workflows

Automate finance processes using automated forms or create custom workflows over a no-code framework to modify sequencing, conditional tasks, approval stages, and more.

### Data-Driven Visibility

Get a true picture of the company's financials, detect risks, assess trends, and more with contextual visualization that enables strategic decisions.

### Alerts and Notifications

Set up intelligent alerts, reminders, and notifications to detect frauds, meet deadlines, avoid compliance gaps and risks, and more.

### Compliance and Reporting

Automate generation of routine financial reports with data from different departments for internal audits and compliance purposes.

**Klera**

Klera™ is a software products and services company focused on creating solutions that deliver intelligence from data, unlike ever before. We enable transparent, collaborative, and connected enterprises, without data silos. Our rapid, no code, intelligent application development platform simplifies how you gather, analyze, and synchronize data.
