

VIGIL ANTISLIP

Industrial and Offshore Stair Nosing and Metal Deck

DISTRIBUTION
NOW

Vigil exports to over seventy countries and manufactures the safest, most durable antislip investment for any industry. The Vigil Antislip industrial range provides the hardest wearing, longest lasting antislip properties available. Fully Guaranteed to maintain 100% of non-slip properties, to resist scuffing and delamination, and to remain impervious to specified fluids and contaminants for ten years, the Vigil Antislip industrial range of Stair, Ladder, and Walkway and Ramp products is ideal for the oil & gas, mining, manufacturing, offshore and marine, engineering, construction, processing and fabrication industries.

STAIR NOSING

Vigil Antislip Stair Nosings guard against the multiple dangers of polished, worn or cracked stairs in places exposed to weather or fluid spills by eliminating the slip hazard, re-profiling the leading edge of the stairs and increasing the shoe contact area.

Vigil Antislip Stair Nosings are guaranteed not to crack, delaminate or wear smooth, and to remain impervious to any fluid spillage and weather condition.

METAL DECK

Surfaces that appear level can be just as dangerous as stairways. Poor lighting, cracked or uneven paving or concrete, and the presence of water, oils or other liquids can seriously aggravate the risk of trips and falls that result in physical harm and lost time.

Vigil Antislip Metal Deck provides highly effective long-term protection for all flat or level surfaces, and for interior or exterior applications. Metal Deck can eliminate the dangers of slips caused by fluid spillage or exposure to other contaminants, as well as increasing the visibility factor for further vigilance against accidents. Available in a range of standard and custom sizes.
