Tychem[®] 2000 SFR

Offers chemical and secondary flame protection in a lightweight garment

DuPont[™] Tychem[™] 2000 SFR garments are intended to be worn over primary flame-resistant garments. In the event that a flash fire occurs, they won't ignite and won't contribute to additional burn injury if appropriate flame-resistant personal protective equipment, such as DuPont[™] Nomex[™], is worn beneath.

Unlike traditional secondary flame-resistant chemical garments that have been available for years, Tychem[™] 2000 SFR garments were specially designed to meet the dual hazard needs of a protective chemical suit with secondary flame resistance.

The fabric used in Tychem[™] 2000 SFR garments is a unique technology. It doesn't char like traditional secondary flame-resistant technologies. Instead, it was designed to shrink away from flame without burning.

Tychem[™] 2000 SFR, only by DuPont.

DNow Safety Services

Above all else, customers are concerned about the safety of their employees and contractors working within their facility. DNow is challenged every day to bring ideas that will help create a safer workplace and better ways for the workers to obtain the products and knowledge they need to perform their jobs safe from accident or injury.

DNow addresses these concerns by constantly communicating with our customers, discussing their product and service needs, achieving a better understanding of the drivers for their business, and always searching for and delivering better ways of servicing customers that bring more value to our relationship.

Each DNow Safety Services branch has experienced, certified, factory-trained technicians for inspection, service and repair of customer-owned safety equipment. Service shops in our branches are equipped with factory-authorized testing equipment, high-pressure breathing air compressors and an extensive inventory of replacement parts and calibration gases.

Safety Services and Solutions

- Rental, Repair and Maintenance
- Instrumentation
- Respiratory Equipment
- Miscellaneous Equipment
- On-Site Store
- Turnaround Services
- Most Popular Rental Items

Inspections and Certifications

In addition to our shop technicians, our field service crews can perform monthly inspections and annual recertification of customers' SCBA breathing equipment, emergency safety showers, eyewash stations and level A protection suits.

SAFETY SERVICES EQUIPMENT RENTALS

Rental, Repair and Maintenance

DNOW Safety Services provides rental, inspection, repair and maintenance of life-saving equipment. Our carefully trained technicians and standard operating procedures ensure that our equipment meets manufacturer standards and customer expectations.

We are nationally recognized as a responsive and well-stocked rental equipment provider with significant advantages for our customers:

- Large Gulf Coast inventory of ready-to-rent equipment
- Immediate equipment pickup or same-day shipping
- Nationwide HAZMAT shipping program
- Significant discounts for high volume or extended rentals

Instrumentation

DNOW Safety Services offers personal single-gas and multi-gas monitors, photoionization detection monitors (PIDs), area monitors, benzene monitors and confined space monitors, for sale or rent.

Our service shops are fully equipped with factory-authorized testing equipment and an extensive inventory of replacement parts and calibration gases. We offer all standard mixtures for gas detector calibration, as well as exotics and custom blends, in all cylinder sizes.

MSA Altair® 5X Multigas Detector

- Standard 4 Gas (LEL, O₂, CO, H₂S)
- NO₂, NH₃ and other toxic sensors
- Advanced PID and IR sensor options
- Includes color display, 10 ft Sampling line and 1 ft Probe
- Ideal for confined space where there is no direct line of sight

MSA Altair® 4XR Multigas Detector

- Standard 4 Gas (LEL, O₂, CO, H₂S)
- SO₂, NO₂ sensors optional
- Rapid response sensors
- Durable personal monitor with rechargeable batteries
- 24 hr run time

MSA Galaxy® GXS Automated Test System

- Available for Altair 4XR and Altair 5X Multigas Detectors
- Color Touch Screen
- Test up to 10 gas detectors simultaneously

Industrial Scientific MX6 iBrid® Multigas Monitor

- Monitor up to 6 gases
- 24 sensor options including PID and IR
- Simplified maintenance and reporting with DSXi Docking Station

RAE Systems UltraRAE 3000+ Portable VOC Monitor

- Accurate measurement of VOCs from .01 to 10,000 ppm
- 3-second response time for VOCs
- Correction factors for more than 350 compounds
- Delivers accurate measurement of benzene from 10ppb to 200ppm

Drager X-zone® 5500 Area Monitor

- Rapid sensor response time
- Detect up to 6 gases
- Highly flexible fenceline configurations
- Easy deployment and set up
- Operates in combination with Drager X-am® 5000 gas detection instruments

RKI Eagle II 4-Gas Monitor for Catalyst Applications

- Durable ergonomic RFI/EMI/chemical/weather-resistant enclosure
- O₂, CH₄ (IR% LEL), CO, H₂S
- Powerful, long-life pump up to 125 ft.
- Internal hydrophobic dust filter
- Intrinsically safe design, CSA approval

Calibration and Maintenance Program

Many customers utilize our monthly gas detector program, in which a DNOW licensed and factory-trained electronics technician performs field repairs to monitors, maintains monitor docking stations, and calibrates each customer-owned gas detection monitor. The calibration report is provided electronically, providing the customer with an independent and traceable record of compliance.

During our monthly visits, customers utilize our technicians as a point of knowledge to answer user questions on gas detection and to troubleshoot any issues or inefficiencies with the customers equipment or gas detection program.

SAFETY SERVICES EQUIPMENT RENTALS

On-Site Safety Stores

DNOW Safety Services has operated on-site safety stores and service centers for over 20 years at customer facilities across the U.S. Our on-site safety technicians maintain a complete ready-to-rent consignment of safety service equipment as well as customer specified PPE. They also serve as a base for our trained safety technicians to perform inspections, repairs, respirator fit testing and other valuable duties.

EQUIPMENT:

- *Plant specified consigned PPE inventory*
- *Certified technicians maintain customer owned equipment*
- *Dedicated rental safety equipment*
- *E-Catalog operating platform*
- *Single monthly summary billing*
- *Fire Resistant Clothing (FRC) program*
- *Respirator fit testing*
- *Plant employee fall protection inspections*
- *Asset tracking*
- *Plant turnaround focal point*

Worker with 12 cylinder pack

CUBe Module

RESPIRATORY EQUIPMENT

DNOW Safety Services provides full line sales, repair service and rental items from the most recognized manufacturers of breathing air equipment including:

3M | Scott-3M | Air Systems | MSA

- 30-minute SCBA Air Packs
- Emergency 5-minute escape airline units
- LP & HP breathing air hose
- Airline respirators
- Welding respirators
- Breathing masks/facepieces
- 5-minute ELSA escape respirators
- Powered air purifying respirators (PAPR)
- Breathing air boxes

Breathing Air Capabilities

DNOW Safety Services has various options to provide the most effective solution for your breathing air requirements, from a simple 2-bottle cart with 120 cubic feet of breathing air to a tube trailer with 165,000 cubic feet of breathing air. Our responsibility is to provide quality, certified Grade D or better breathing air in a size and configuration to meet your needs.

Breathing Air Certificates of Analysis

We exceed standard requirements for testing and analysis of breathing air. Breathing air is tested through our own in-house processes, as well as by the Lab On Locale™ portable gas analysis system or other 3rd party certifications. Certificates of analysis (COAs) are provided for all shipments of breathing air.

Breathing Air Volume Requirements

There are many factors that influence the safe consumption of breathing air. These factors include the type of respirator, the adjustable flow rate, the number of supplied users and the breathing rate/capacity of the respirator wearer. Give DNOW Safety Services a call to help you select the most effective solution based upon your unique needs.

Tube trailer

BREATHING AIR CONFIGURATIONS

- 2-bottle carts (90 or 300 cu. ft. cylinders)
- 6 and 12 packs (1,800 or 3,600 cu. ft.)
- 12- and 20-bottle trailers (3,600 to 6,000 cu. ft.) as well as space to store equipment
- CUBe module (86,000 cu. ft)
This lightweight container (12 ft. X 10 ft. X 10 ft.) is mounted via cam-locks on a goose-neck trailer and can be lifted off the trailer if space is a concern.
- Tube trailers (165,000 cu. ft.)
- Kodiak low-pressure compressor trailer – provides up to 400 SCFM of breathing air at 132 psi after filtration. For larger breathing air jobs, this trailer can provide considerable savings, as well as increased safety from not having to move equipment in and out of the work site.

20 bottle trailer

BREATHING AIR CONSUMPTION (CFM) GUIDELINE

Air Storage System	Storage Capacity	80% Swap-out	Number of Respirator Users							
			2		10		40		80	
			Scott	3M	Scott	3M	Scott	3M	Scott	3M
Hours of air supply with 80% swap-out										
2-Bottle cart	600	480	2	0.4	0.4	0.1	0.1	0	0.1	0
12-Pak	3,600	2,880	12	2.7	2.4	0.5	0.6	0	0.3	0

Kodiak (400 cfm) 10 hour shift	240,000	240,000	1000	222.2	200.0	optimal				na
Scott Airline with escape air usage in cfm	2		Note: Will fluctuate with breathing rate, pressure, and use of purge							
3M welding mask air usage in cfm	9		Note: Respirator is approved for flow rates from 4 - 15 cfm							

Turnaround & Shutdown Services

DNow Safety Services offers on-site mobile and stationary facilities to support your peak requirements for rental equipment, personnel and safety products. You can count on us to provide turnaround solutions that will be accident free, on budget and with no work stoppages due to equipment being unavailable.

Our scalable resources across several Gulf Coast safety centers allow DNow to rapidly staff and equip any unscheduled plant outage or emergency. By utilizing the DNow turnaround tracking software, all product issues and equipment rentals can be tracked by company, contractor, employee and supervisor, helping customers maintain control, increase accountability and minimize lost equipment.

WORLD-CLASS SOLUTIONS:

- *Safety equipment rental*
- *Equipment issue and service trailers*
- *Breathing air bottles, racks, trailers and compressors*
- *Safety technicians and safety personnel*
- *Compressor & bottle watch*
- *Fit testing and equipment training*
- *Equipment tracking*
- *Expenditure tracking and reporting*

Kodiak Breathing Air Compressor Trailer

DNOW's Kodiak breathing air system is a cost-effective solution for breathing air requirements.

The Kodiak is a low-pressure (132 psi) breathing air compressor system that delivers 400 SCFM of Grade D breathing air after filtration. Inlet air is monitored for CO₂, LEL CO and H₂S. Breathing air is continuously monitored for O₂, CO, CO₂ and moisture via a fixed, multichannel analyzer.

Twin air filter/dryer towers deliver the Grade D breathing air to two 240 gallon tanks (480 gal total), which act as storage/buffer to smooth the supply of air downstream to air storage pots, manifolds and respirators.

Features

The Kodiak breathing air system provides up to 400 SCFM with a back-up connection to 12 packs or a tube trailer. The two compressors can be run independently from one another or in tandem. When running independently the second compressor automatically starts if the first compressor fails. If both compressors shut down or pressure drops below 120 psi, a pressure regulator diverts air from the back-up connection to ensure that users have adequate air supply.

COST ANALYSIS EXAMPLE

- 50 workers @ 4 SCFM, working 8 of 12 hours per shift, for 2 shifts
- 192,000 SCFM per day would require 1.5 tube trailers per day
- Cost would be approximately \$4,250 for air each day for tube trailers

Kodiak low-pressure compressor trailer

Benefits

DNow's system provides a safe, efficient and cost-effective breathing air supply. It eliminates the requirement of constantly moving large tube trailers in and out of the site, which can cause work stoppage and safety issues related to moving vehicles when contractors are working.

SPECIFICATIONS:

- 16 ft. enclosed trailer with swing doors and ramp
- Man-door on front right side
- Trailer dimensions: 17 ft. 6 in. (20 ft. with ramp down) X 8 ft. 6½ in. X 8 ft. (LxHxW)
- Two compressors, 220 SCFM at 132 psi
- Emergency crossover valve system
- Twin regenerative dryer/filtration towers
- Multi-gas analyzer for O₂, CO, CO₂ and moisture with audible and visual alarms
- Two 240 gallon receivers for air storage
- Voltage: 460 VAC/3/60 Hz, 200 amp

SAFETY SERVICES EQUIPMENT RENTALS

Fall Protection

DNOW Safety Services offers an extensive rental inventory of the most requested personal fall protection devices.

DBI-SALA Tripods

- All-aluminium construction
- 9 ft. and 7 ft. models available
- Mounting brackets for 3-way devices
- Mounting rings for self-retracting lanyards

DBI-SALA 3-Way Retrieval Self-Ratcheting Lifeline

- 50 ft., 75 ft. and 130 ft. units available
- Compact, lightweight design
- Patented Seal-Bloc body

MSA 30 ft. Workman Self-Retracting Lanyard

- Galvanized lifeline
- Swivel snaphook
- 400 lb. working capacity

Full-Body Harness with Single Dorsal D-Rings

- Universal size
- 2x/3x sizes available
- Tongue and buckle leg straps
- Zinc-plated steel hardware

Dual Self-Retractable Lanyard

- Pelican or Snaphooks available
- 6 ft. lifeline
- Swivel top
- Internal shock absorbing system

The BRICK®

Portable Explosion-Proof LED Area Light

- Durable, solid aluminum block body
- Suitable for wet location use
- 110V 100 ft. power cord
- >11,500 lumens light output
- Magnetic mechanical mounting knuckle

THE BRICK®
WESTERN TECHNOLOGY

11,500 Lumens+ Optics
GEN3
RETRACT

Miscellaneous Safety Equipment

We understand the requirements for life-saving equipment during intense projects. DNOW Safety Services is equipped to meet peak demands, specialized applications, and demanding schedules with a full line of safety gear:

- Portable safety eyewash and showers
- Fall protection harnesses, lanyards, retractable lifelines, tripods, and retrievable lifelines
- Explosion proof portable lighting
- Emergency lighting
- Ventilation equipment, ram fans, venturi air movers, and electric blowers
- Cooling vests
- Portable fire extinguishers
