

Ingesting and Rendering Technical Documents

With Adlib PDF, this global provider of defense and security products was able to create an integrated rendering solution for hundreds of users.

THE CHALLENGE

This manufacturing company needed to create a process where 300-400 concurrent Dassault Systèmes ENOVIA PDM (Product Data Management) users could run multiple summary reports into one PDF document for customers. They also needed to convert HTML web tables and forms from the PDM to PDF.

They were faced with a number of trying challenges. This organization needed to:

- Integrate PDF rendering into their PDM
- Improve the slow and manual process of converting PDF files
- Reduce the inefficiency of using a decentralized and disorganized system

THE RESULT

Adlib PDF is built for engineering environments and complex conversion. Capable of transforming thousands of documents per day, Adlib made short work of complex engineering content and summary reports, ingesting and rendering them to a PDF repository for this manufacturer.

By using Adlib, this global provider of defense and security products achieved a number of benefits:

- Integration of Adlib PDF with Dassault Systèmes ENOVIA PDM for a complete rendering solution
- Full automation of the PDF conversion process
- A streamlined documentation process so customers can receive reports in a specific technical format
- Improvement of efficiencies for end users

Advanced Rendering enabled this manufacturing company to transform thousands of documents per day and process complex engineering content and summary reports, ingesting and rendering them to a PDF repository.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
