

Capitalizing on Smooth Integration

By using Adlib, a US-based insurance company's existing systems were pulled together into an automated rendering solution that bridged platforms and increased efficiency.

THE CHALLENGE

A US-based insurance company providing a number of group and individual products needed to create a rendering solution that easily integrated with existing systems.

Typical volumes of 5,000 items per day needed to be reliably handled as an unattended, batch process.

They were faced with a number of complicated challenges. This insurance organization needed to:

- Integrate with their current systems: IBM® FileNet®, OpenText® and Microsoft® SharePoint®
- Support multiple file types for PDF conversion
- Create high-fidelity PDF files without manual intervention

THE RESULT

Adlib has a lot of experience ensuring clients receive exceptional integration capabilities. Adlib's strong acceptance in enterprise environments stems to a large degree from strong integration capabilities supporting diverse systems. In this instance, existing systems were pulled together into an automated rendering solution that bridged platforms and increased efficiency.

By using Adlib PDF, this insurance organization was able to achieve a number of benefits:

- Implementation of a single, automated rendering solution that works with current systems
- Allowance for an upgrade path from current to future file types
- Increase of efficiency by allowing PDF generation with watched folders configured in Adlib

Advanced Rendering enabled this US insurance company to consolidate rendering across their existing platforms and provide support for multiple file types.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
