ADLIB®

Enabling Company-Wide Information Access

By using Adlib, a development and investment bank rendered Microsoft Word®, Excel® and Photoshop documents overnight and added intelligent metadata to enhance access to critical corporate information.

THE CHALLENGE

To find a better method to share information in an efficient and reliable central archive, a development and investment bank in Asia Pacific needed to manage the daily generation of 12,000 Microsoft Word, Excel and Photoshop documents.

They were faced with a number of difficult challenges. This organization needed to:

• Improve the current slow and manual process of converting documents

• Enable an easier way to effectively search for content

• Allow employees to share documents internally and externally

• Meet daily high volume requirements

THE RESULT

Beyond the well-recognized enterprise scalability and support for high-volume conversions, Adlib excels at creating intelligent metadata as a part of the conversion process to enhance access to critical corporate information. In addition, PDFs make sharing and collaboration easier for employees and external stakeholders.

By using Adlib PDF, this investment bank was able to achieve a number of benefits:

• Consistent conversion of rich text PDFs with automation

• Ability to OCR files to enable easier search functionality

• Sharable transactional data and documents across business divisions and systems

• High volume demands met

Advanced Rendering enabled this banking organization to add value to their content by making it accessible and sharable.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document–to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
