ADLIB®

Extending IBM® FileNet® with Adlib Capabilities

With Adlib's accurate PDF rendering, wide range of supported file types, and top-notch reliability, this insurance company automated document renditions as part of a rules-driven IBM FileNet workflow for improved process efficiency.

THE CHALLENGE

A property and casualty insurance company needed to identify a PDF rendering solution that processed a high volume of records and cases for claims processing, while integrating with their existing systems.

They were faced with a number of intricate challenges. This insurance organization needed to:

• Manage high volumes of records and cases on a frequent basis

• Find a cost-effective and efficient way to automatically convert files to PDF

• Integrate with their existing Enterprise Content Management system, IBM FileNet

THE RESULT

Adlib provides exceptional support for document management projects. With accurate PDF rendering, a wide range of supported file types and top-notch reliability, Adlib provides the optimal extension for IBM FileNet. This insurance company took advantage of these capabilities to automate document renditions as part of a rules-driven IBM FileNet workflow for improved process efficiency.

By using Adlib PDF, this insurance organization was able to achieve a number of benefits:

• Implementation of a solution that handled current high volume of cases and can scale to greater volumes as needed

• Faster and more accurate claims processing through an automated system

• Reduction of time and labor costs

• Automated integration of PDF output into IBM FileNet for records management

Advanced Rendering enabled this insurance company to extend the capabilities of IBM FileNet by integrating Adlib's PDF rendering engine directly into the familiar interface.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document–to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
