

## Enabling Improved Emergency Services

By using Adlib this life sciences company automated the issuing of PDF documents electronically to hospitals, saving money and improving the productivity of its workers.

### THE CHALLENGE

A company which provides emergency department physicians for hospitals and municipalities needed to develop an automated system that would replace the manual process of printing hardcopy documents and mailing them to hospitals.

They were faced with a number of hard challenges. This organization needed to:

- Convert the current manual workflow to an automated one
- Reduce costs for this document process
- Streamline workflow to free up end user time
- Supply documents to hospital staff in a timely manner

### THE RESULT

Adlib can help organizations to move from a paper-based office to a paperless one. Paper-intensive processes waste time and money in the workplace. As this life sciences company learned, Adlib's solution offers an easy transition for eliminating the waste of paper. By automating the issuing of PDF documents electronically to hospitals, the company saved money and freed up workers.

By using Adlib, this life sciences organization achieved a number of benefits:

- Implementation of an automated process for PDF rendering
- A system that streamlines processes and saves worker time
- The ability to email PDF files or post them to a portal for easy access by hospitals, in lieu of mailing hardcopies

**Advanced Rendering enabled this life sciences organization to move to a paperless workflow and free up hospital staff time to concentrate on emergency services.**

### WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
