

Converting, Combining and Enhancing

With Adlib, this foundation improved its capabilities for accessing and automatically converting documents from SharePoint, helping fulfill its mission.

THE CHALLENGE

A grant-making foundation that supports initiatives in education, world health and population was looking to render 5,000 to 10,000 documents annually in an efficient, accurate, and reliable manner.

They were faced with a number of interesting challenges. This organization needed to:

- Ensure rendered files are accurate
- Replace the current error-prone system
- Create a reliable way to access rendered files in Microsoft® SharePoint®
- Enable printing of rendered documents from within SharePoint

THE RESULT

This non-profit foundation improved its capabilities for accessing and automatically converting documents from SharePoint, helping fulfill its mission to produce documents for funding grants in a timely manner.

By using Adlib PDF, this NPO was able to achieve a number of benefits:

- ✓ Implementation of an accurate rendering system
- ✓ Reduction in errors by eliminating manual processes
- ✓ Provision of easy access to documents for all SharePoint users
- ✓ Integration with SharePoint

Advanced Rendering enabled this non-profit organization to create error-free PDF documents integrated directly into SharePoint.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
