

## Modernizing the Handling of Text Cables

Adlib helped this agency abandon its archaic system of storing and sharing text cables, creating NARA-compliant PDF/A files as part of an automated workflow that saved the agency time and money.

### THE CHALLENGE

A state government agency was looking to implement a reliable and scalable solution that stores and archives text cables, enables sharing, and submits the files to NARA (National Archives and Records Administration) in PDF/A.

They were faced with a number of unique challenges. This organization needed to:

- Replace the current antiquated system
- Render and archive text cables so they can be shared with different employees across the organization
- Adhere to the PDF/A compliance requirement from NARA

### THE RESULT

Text cables are still an important part of the communication mix for government agencies. Adlib helped this agency abandon its archaic system of storing and sharing text cables by creating NARA-compliant PDF/A files as part of an automated workflow that saved the agency time and money.

By using Adlib PDF, this government organization was able to achieve a number of benefits:

- ✓ Significant cost savings with an automated system
- ✓ Improvement in employee access to information
- ✓ Establishment of an automated archiving process for old text cables
- ✓ Demonstration of compliance with NARA guidelines
- ✓ Integration of the PDF/A rendering solution with Microsoft® SharePoint®

**Advanced Rendering enabled this government organization to automate archiving processes, meet compliance regulations and increase efficiency.**

### WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
