

Transforming Documents with Precision for IT Consultants

With Adlib, this IT services company substantially boosted the quality of its PDF output and enhanced the accuracy of rendering by moving to an automated workflow.

THE CHALLENGE

To implement a document rendering solution that produces high-quality and accurate results, this IT services and consulting company needed software that could create high-fidelity PDFs.

They were faced with a number of challenges. This organization needed to:

- Greatly improve the existing quality of PDF output
- Ensure rendered files were accurate and high-fidelity copies of original files
- Improve the current slow and inefficient manual process to convert documents and perform quality analysis

THE RESULT

Adlib PDF creates high-fidelity renditions of business-critical documents so organizations don't need to worry about the accuracy of their conversions. Adlib's solutions have industry recognition for accuracy (achieving validation of 202 of 204 test cases in the Isartor Test Suite). This IT services company substantially boosted the quality of its PDF output and enhanced the accuracy of rendering by moving to an automated workflow based on an Adlib solution.

By using Adlib, this IT services company was able to achieve a number of benefits:

- High-fidelity and accurate PDFs
- Introduction of an automated process integrated with EMC® Documentum®
- An increase in productivity and business efficiency

Advanced Rendering enabled this organization to ensure their rendered files were always accurate.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
