ADLIB®

Enhancing Engineering Efficiency

By using Adlib, an American oil and gas exploration company merged the rendering of schematics into a single platform which increased access and collaboration through-out company workgroups and enabled fluid integration with SharePoint and Documentum.

THE CHALLENGE

An American oil and gas exploration company was looking to process and assemble AutoCAD drawings from their engineering partners and vendors.

They were faced with a number of interesting challenges. This organization needed to:

- Access thousands of AutoCAD schematics in both the office and in the field
- Find a way to connect to Microsoft® SharePoint®
- Access and share records in EMC® Documentum®

THE RESULT

With Adlib, this customer was able to merge the rendering of schematics into a single platform. This increased access and collaboration throughout company workgroups and enabled fluid integration with SharePoint and Documentum.

By using Adlib PDF, this utilities and energy organization was able to achieve a number of benefits:

✓ Enabled access for schematics for internal engineers and field workers

✓ Consolidation of rendering platforms into a single, company-wide solution

✓ Demonstration of corporate compliance

✓ Integration with SharePoint and Documentum

✓ Upgrade to Adlib Enterprise resulting in an increased number of licenses

Advanced Rendering enabled this energy company to provide access to CAD schematics for field workers and internal employees.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document–to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
