

Performing Versatile Document Conversion

By using Adlib, a global energy leader automated a comprehensive solution for unattended batch processing of thousands of documents and images which resulted in improved customer experiences, reduced paper flow, and increased workgroup productivity.

THE CHALLENGE

A global energy leader with a diverse resource portfolio was looking to replace the manual PDF processing, printing and mailing of a huge volume of Microsoft® Office® files and images to more effectively share them with customers.

They were faced with a number of complex challenges. This organization needed to:

- Find an efficient and quick alternative to processing, printing and mailing PDFs
- Reduce the amount of paper processes
- Improve the productivity of the workforce
- Enable the searchability of TIFF files

THE RESULT

Adlib created and automated a comprehensive solution for unattended batch processing of thousands of documents and images. This improved customer experiences, reduced paper flow and increased workgroup productivity.

By using Adlib PDF, this utilities and energy organization was able to achieve a number of benefits:

- ✓ Creation of batch processing of documents in a watched folder and automation of image scans consisting of 28,000 documents per month
- ✓ Improvement in customer satisfaction with faster and more accurate information by providing a link instead of paper
- ✓ Savings in time for 700 users by eliminating the printing and mailing of files
- ✓ Implementation of full-text search and PDF/A archiving

Advanced Rendering enabled this energy company to automate the conversion of 28,000 documents per month.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
