

Powering Better Information Access

By using Adlib, this power and energy company fully automated their processes, demonstrating compliance to regulatory authorities, providing access to critical documents in the field, and enabling corporate users to create standardized PDF files for internal and customer use.

THE CHALLENGE

A power and energy company with 16,000 employees and 2,000 Adlib users was looking to create PDF files from Microsoft® Word® and CAD documents from multiple divisions. They needed to provide access to the PDFs for corporate users, field technicians and regulatory bodies.

They were faced with a number of arduous challenges. This organization needed to:

- Find an alternative to the current slow and inefficient manual process
- Demonstrate compliance to regulatory agencies
- Increase access to PDF files for all users
- Address high volume demands

THE RESULT

Adlib's solutions help create company-wide information sharing. In this instance, the power company fully automated their processes, demonstrating compliance to regulatory authorities, providing access to critical documents in the field, and enabling corporate users to create standardized PDF files for internal and customer use.

By using Adlib PDF, this utilities and energy organization was able to achieve a number of benefits:

- ✓ Improvement in the accuracy and speed of workflows with automation
- ✓ Demonstration of compliance to regulators
- ✓ Provision of easy access to all users
- ✓ Consistent meeting of high-volume requirements

Advanced Rendering enabled this energy company to convert documents to PDF, enabling better access to corporate users, field workers and regulatory bodies.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
