

Transforming Your Business

Maximize your potential by automating document-based work

You rely on documents every day to deliver products and services to your customers. They are critical to what you do and make up most of your data—experts estimate nearly 80 percent. Dealing with these documents is challenging. Manual processing like converting, OCRing, merging, and bookmarking are slow, expensive, and error prone. Even if you had a bigger team, the effort to get things done the right way, on time, and within budget would be nearly impossible. Adlib Transform changes the way you work by adding processing power without adding people. Adlib automates document-based tasks at scale to reduce costs, make compliance easier, and improve the way you operate.

"The world is moving faster than ever before, and it's essential that technology and processes are able to keep up to support digital innovation needs."

— Daryl Plummer,
Distinguished VP Analyst,
Gartner

Some of the Many Benefits

DELIVER CONSISTENT STANDARD OUTPUT

Workflows are more efficient with high-quality structured data.

MAKE EVERY DOCUMENT SEARCHABLE

Compliance is difficult if only a part of the data can be searched.

SPEND LESS TIME CONVERTING

"Save as PDF" is not an option for massive amounts of documents.

ELIMINATE ERROR-PRONE MANUAL PROCESSING

Repetitive deadline-driven work is a prime candidate for mistakes.

SCALE TO MEET DEMANDS

Onboarding new resources is not a workable long-term solution.

The Essentials

High-fidelity Conversion

Transforms 300+ file types including Microsoft Office, images, scans, emails, reports, CAD drawings and other types of content into standardized PDF documents.

Accurate Details Are Important

Intelligent Recognition

Turns images into fully text searchable PDFs—including JPG, CAD, and vector graphics—using advanced Optical Character Recognition (OCR) and Optical Mark Recognition (OMR).

Every Bit of Text Matters

Automated Publishing

Assembles documents by merging files, creating tables of contents, inserting headers & footers, watermarks, active hyperlinks, digital signatures, and security settings.

Consistent Output Drives Success

PDF/A Output

Creates ISO-standardized versions of the Portable Document Format (PDF) specialized for use in the archiving and long-term digital preservation of documents.

Persevere Documents Long-Term

Off-The-Shelf Integrations

Offers seamless, out-of-the-box integrations to a wide variety of content repositories including folder shares, Outlook, OpenText, Documentum and SharePoint.

Accelerate Time to Value

Batch Processing

Monitors 1 or more locations to ingest and bulk process documents at scale.

Scale to Meet Demands

Between 2012 and 2020, the digital universe will grow by two times every two years.

— IDC

Easily Automate, Integrate, and Manage Document Conversion

AUTOMATE

Adlib automates the document-to-PDF transformation in your processes and document workflows, such as those within your ECM system or SharePoint, to improve productivity by reducing the risk of manual error.

Adlib includes a comprehensive Rules Engine for configuring metadata-driven document workflows. This feature automates business processes by applying specific instructions at the document level on how to:

1. Merge various documents into a PDF
2. Add enhancements
3. Assign priorities

INTEGRATE

Integrate Adlib with other ECM, Workflow, and Business Processing Management systems, including Documentum, IBM FileNet, OpenText ECM Suite, Microsoft SharePoint, and Dassault. Other integrations are possible through Adlib's connector framework or by leveraging a web services interface between Adlib and any external client application or business process, and through a simple Folder Connector integration that monitors folders for content.

MANAGE

Adlib manages configuration, reporting, and system health monitoring in a centralized fashion for optimal business continuity. By simplifying system management and providing early warning of potential problems, Adlib's powerful yet intuitive centralized management reduces IT costs and allows you to be more proactive.

Transform with Adlib

See how Adlib can help you maximize your potential by automating document-based work.
