Rodney Mason, CMO
METHODOLOGY

daVinci Payments conducted a national online panel via SurveyMonkey® October 1, 2020. Results are reflective of the U.S. population with a 97% confidence level.

1,026 U.S. adult shoppers were surveyed and filtered to 490 male respondents.
1. Online, mobile and contactless dominate the way men are shopping, driven by a need for convenience and time.

2. Amazon is #1 for men! It is how they learn about brands, where they shop online and has the top loyalty program.

3. Price is a top purchase decision factor, which is why most men prefer to receive a rebate for better price vs. an instant discount, and demand loyalty reward programs.

4. Prepaid cards are the preferred shopping reward and refund payment method of choice, with a huge opportunity to deliver cross sell offers with prepaid delivery.

5. Delivering offers with rewards drives spend-back of promotional dollars.

6. Social media, subscription shopping and consignment reseller shopping sites are taking an increasingly large market share, as online shopping continues to expand.
2020 INCOME WAS DOWN

Compared to 2019, household net income was down -6%.

- 34% Income Increased
