

# 5 Ways to Use LiveSafe During Inclement Winter Weather

**1**

## Broadcast Messages

Send broadcast messages to your community to keep them informed.

**Use Case:** Send a broadcast message via text, email, or the LiveSafe Mobile App to notify users of weather-related road closures.

**2**

## Report Incidents & Suspicious Activity

Inclement weather can lead to injury, maintenance issues, and other safety and security concerns.

**Use Case:** Users can report safety hazards (ex: black ice) or facilities concerns (ex: frozen pipes).

**3**

## Check In

Have members of your community check in on the app so you know that they are safe during hazardous winter weather.

**Use Case:** During dangerous storms, send check-ins to users to ensure community safety.

**4**

## Geofence

Create geofences around specific locations to ensure you are reaching the people who at the highest risk for inclement weather.

**Use Case:** During holiday breaks, send messages to users who are still on campus.

**5**

## Resources

Upload your school's inclement weather policies, procedures, and resources to the "Resources" feature in the app.

**Use Case:** Users can easily access weather-related safety protocols.
