

LiveSafe Insights

Detect Emerging Risk Trends and Improve Your Prevention Strategy

LiveSafe Insights helps the world's premier institutions intelligently source and analyze crowdsourced data generated from the LiveSafe Platform. The Insights Product is a best-in-class tool that enables your organization to analyze all aspects of its LiveSafe deployment and construct a unique risk profile to surface actionable trends and early warning indicators. LiveSafe Insights delivers the intelligence you need to better leverage community-sourced threat detection to solve your most daunting safety challenges.

Custom Risk Profile

Inbound tips submitted to the LiveSafe Dashboard are algorithmically analyzed to classify and score tips on a variety of dimensions. This shows trending topics, newly detected threats, and shifting priorities.

Continuous Improvement with Tailored Reports

LiveSafe Insights reports help organizations understand how their community is succeeding with LiveSafe and where they can improve their intelligence gathering. Monthly reports provide actionable, operational recommendations to enable you to maximize your ability to gain relevant insights.

Benchmarking to Provide Guidelines

LiveSafe dynamically compares every organization with others of similar size, usage, deployment type, and more to help understand risks and trends in their communities. By pairing like organizations, all are able to learn and grow together from the aggregate, anonymized usage data.
