| Meghan Gillette | PhD (Iowa State University; Lecturer in the Department of Human Development and Family Studies in the College of Human Sciences) |
| Michael Dorneich | PhD (Iowa State University; Associate Professor in Department of Industrial and Manufacturing Systems Engineering in the College of Engineering) |
| Brian O'Dwyer | MBA (CognaLearn™*, Duke-NUS, Embry-Riddle Aeronautical University Asia; Commercial Co-founder of CognaLearn™, Adjunct Professor at Embry-Riddle Aeronautical University Asia; Entrepreneur in Residence in the Center for Technology and Development at Duke-NUS Medical School Singapore) |
| James Grogan | PhD (Oakland University; Professor in the Department of Biomedical Sciences at the William Beaumont School of Medicine) |
| Tom Brown | EdD, MBA (Simon Fraser University; Academic Director in the Beedie School of Business) |
| Bruce Leonard | PhD, APRN, FNP-BC, NP-C (University of Texas Medical Branch; Professor in the School of Nursing) |
| Jane Rongerude | PhD, MCP (Iowa State University; Assistant Professor of Community and Regional Planning in the College of Design) |
| Liz Winter | PhD, MA, LSW (University of Pittsburgh; Academic Coordinator of the Pennsylvania Child Welfare Education for Leadership Program in the School of Social Work) |

- The presenter is the Commercial Founder of and has a financial interest in CognaLearn. CognaLearn is the company that developed InteDashBoard™ www.intedashboard.com, which is TBL software developed in collaboration with Duke-National University of Singapore Medical School; InteDashBoard™ is one of the technology tools shown in screenshots in this presentation.

Teamwork

Objectives

After this session participants should be able to:

- 1. Define:** team-based learning (“TBL”)
- 2. Rank benefits:** rank order the top three reasons TBL would benefit students
- 3. Rank challenges:** rank order the top three concerns about implementing TBL in the online asynchronous modality

Team-based learning (“TBL”)

In class: theory

In class: apply

1. Pre-work

2. Quiz

3. Team
quiz

4. Clarify
doubts

5. Team
applications

Also 360° teammate evaluation

TBL in practice

Originated in 1970s
by Larry Michaelsen
in Marketing

Used by 100s of
universities globally

Emerging K-12, government, employability and corporate

1. Pre-work

Module 3 – Aircraft Performance Learning Objectives

After this module you should be able to:

- Calculate aircraft performance metrics:
 - Take-off and landing distances
 - Fuel consumption
 - Crosswind
 - Weight and balance
- Describe what factors affect aircraft performance such as altitude, temperature, weight, air pressure, head/tailwind, etc.
- Compare aircraft types on performance

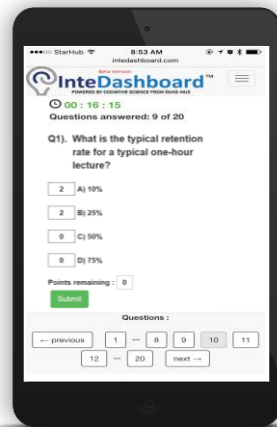

EMBRY-RIDDLE
Aeronautical University

Articles to Allerton: Applying team based learning methods from Duke-NUS Medical School of Singapore to flip the classroom for active and relevant learning at Embry-Riddle Aeronautical University Asia

17

2. Individual Readiness Assurance Test (“IRAT”)

3. Team Readiness Assurance Test (“TRAT”) with immediate feedback

4. Clarifications

5. Applications

Significant problem

Same problem

Specific choice

Simultaneous report

Canberra

Sydney

Peer evaluation

- Team members “grade” each other on their performance as team members
 - Mitigates “free rider” problem
 - Learn by evaluating performance

Quantitative Analysis

To complete this section, you must distribute the given number of points among your teammates. ✕

| Teammate | Score |
|---|---------------------------------|
| Team member 1 | <input type="text" value="9"/> |
| Team member 2 | <input type="text" value="11"/> |
| Points Remaining : <input type="text" value="0"/> | |

Divide 20 points among your two teammates

Qualitative Analysis

To complete this section, you must answer all the questions marked with an asterisk. ✕

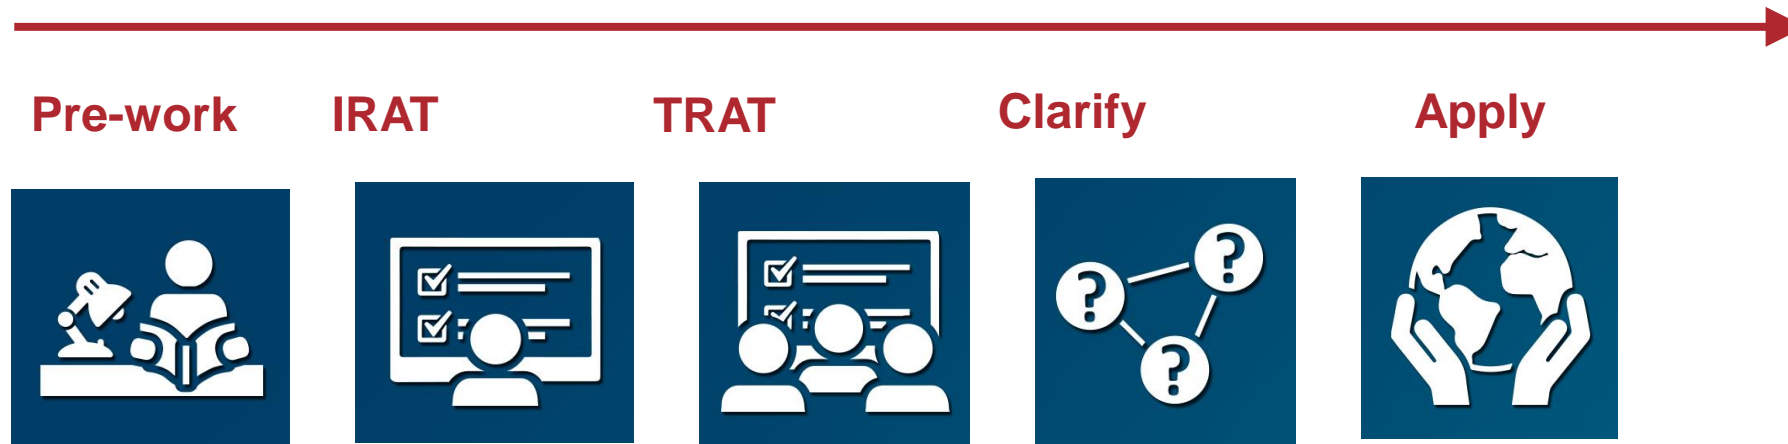

demo1#2 Generic

What did your teammate do well and should continue doing?

What you could your teammate do differently to become a better teammate?

Backwards design

TBL Class Flow

Backwards Design

Team formation

- Always instructor created to create a diverse team
- Same teams for the entire term
- 2-3 evaluations per term
- Sizes: typically 5-7 in face-to-face
- Online modalities:
 - Smaller team size (3 or 4)
 - More frequent evaluation

Academic schedule example

3-hour (1x per week)

Readiness Phase (75 min)

- IRAT (20 MCQ) 25 min
- TRAT (20 MCQ) 25 min
- Clarify doubts 25 min

[Break]

Application Phase (75 min)

- Application cases 3-6x (5-15 min each)

1-hour (3x per week)

Monday

- IRAT (10 MCQ) 15 min
- TRAT (10 MCQ) 15 min
- Clarify doubts 30 min

Wednesday

- Cases ~3x (5-15 min each)

Friday

- Cases ~3x (5-15 min each)

Online synchronous

- Generally similar to face-to-face
- Can take longer
- Technology coordination
- Smaller team sizes
- More frequent peer evaluation (in academic context)

Online asynchronous example

Three weeks per topic

Week 1:

Readings and pre-work

Week 2/3:

Monday: IRAT (24 hours)

Tue-Wed: TRAT (48 hours)

Thur-Tue: Applications (6 days)

Wed-Sun: Applications discussion (5 days)

One week per topic

Monday/Tuesday

- IRAT

Wednesday/Thursday

- TRAT

Friday/Saturday

- Application exercises

Implementing TBL at ERAU

Short-term

- **Prework:** largely done already
- **Theory:** run existing quizzes first as individual and then as a team (Canvas calls them “groups”)
- **Applications:** use existing cases and...
 - a) Team cases: Team cases instead of individual
 - b) Same problem: All teams work on the same problem (e.g. same airport)
 - c) Specific choice: Solution is a specific choice or business decision (which aircraft; rank the top three reasons for or against a decision)
 - d) Reporting and debrief: Teams select or vote for the best response other than their own
- **Teammate evaluation:** peer grading, divide up points or comments

Long-term

Consider instructional design with TBL in mind, immediate feedback on team quizzes, team clarifications, electronic gallery walks, anonymous peer evaluation reporting and AI teammates

Reflect and report

- 1. Benefits:** rank order top three reasons TBL would benefit students
- 2. Challenges:** rank order the top three concerns about implementing TBL in the online asynchronous modality

Benefits: results of chat feedback

- Fosters desirable qualities of future employees
- Real world experience
- Students learn to work together
- Students learn to collaborate
- Students learn to make a decision
- students learn to back up their decision
- Great venue for applying course concepts to real-world / aviation applications
- I love that idea of taking the test as a team and discussing the answers.
- I love the idea of making students make a decision.
- My dissertation topic is on the subject of student-to-student interactions, more so as it applies to developing social presence. However, SSI to support learning is equally interesting
- Real-world experiences tackling issues and finding solutions.
- Looking at an issue from all sides and considering other possibilities
- Structure
- Students learn to collaborate with a team
- Giving them an experience of collaborating virtually is an important skill

Summary

- **Team-based learning (“TBL”):** specific type of blended learning
 - Theory: Pre-work followed by individual and team testing then clarification
 - Application: Significant, Same, Specific choice and Simultaneous report
 - Teams: Instructor created with teammate peer evaluation
- **Mission critical team environments:** used in health sciences (medicine and nursing)
- **Modality:** Originated in face-to-face environments, expanding to online
- **Learn more:** Team-Based Learning Collaborative
 - www.teambasedlearning.org
 - Annual meeting: March 14-16 2019 in Tampa (ERAU Prescott faculty attended in 2018)

Teaching Research to MSW Students: Effectiveness of the Team-Based Learning Pedagogy
Macke, Caroline; Tapp, Karen – Journal of Teaching in Social Work, 2012
Social work students often have been labeled as research-reluctant. Consequently, it is important to identify effective teaching strategies. One innovative strategy is team-based learning. The effectiveness of team-based learning has not yet been evaluated with a social work research class. As a result, the current study compared the effectiveness...

Team-Based Learning
Michaelsen, Larry K.; Sweet, Michael – New Directions for Teaching and Learning, 2011
Team-based learning (TBL), when properly implemented, includes many, if not all, of the common elements of evidence-based best practices. To explain this, a brief overview of TBL is presented. The authors examine the relationship between the best practices of evidence-based teaching and the principles that constitute team-based learning. (Contains...

Creation of Exercises for Team-Based Learning in Business
Timmerman, John E.; Morris, R. Franklin, Jr. – International Journal of Teaching and Learning in Higher Education, 2015
Team-based learning (TBL) is an approach that builds on both the case method and problem-based learning and has been widely adopted in the sciences and healthcare disciplines. In recent years business disciplines have also discovered the value of this approach. One of the key characteristics of the team-based learning approach consists of...

Social Work Students' Perceptions of Team-Based Learning
Macke, Caroline; Taylor, Jessica Averitt; Taylor, James E.; Tapp, Karen; Canfield, James – Journal of Teaching in Social Work, 2015
This study sought to examine social work students' perceptions of Team-Based Learning (N = 154). Aside from looking at overall student perceptions, comparative analyses examined differences in perceptions between BSW and MSW students, and between Caucasian students and students of color. Findings for the overall sample revealed favorable...

Curriculum and resource savings

Classroom time

Faculty time

Better exam scores

Kamei RK, Cook S, Puthuchery J, Starmer CF. Medical Science Educator. 22: 2012.

Note: Classroom and faculty time are unpublished estimates. Exam scores versus US national average published as cited..

Effectiveness in large classes

Traditional class

Outcomes decline as class size increases

Outcomes

1 20 40 70 140 200 500 1,000

Number of students

TBL class

Outcomes rise and maintain better as class size increases

Outcomes

1 20 40 70 140 200 500 1,000

Number of students

Illustrative

Considerations

- Design of TBL course materials (pre-work, questions and cases)
- Change management for educators and learners
- Administrative process to implement

Applications

Applications are the heart of the TBL process and should closely be aligned to learning objectives. Three main types of applications:

1. **Choose:**
2. **Critique:**
3. **Create:**

Application example: choose

The government is considering privatizing Changi airport

1. Rank order the top three reasons *for / against*?
2. Would you pursue this policy?
 - a) Strongly agree
 - b) agree
 - c) neutral
 - d) disagree
 - e) strongly disagree
3. Rank order the top three risks of policy.
4. What would you change or do to mitigate the risks of this policy?

Application example: critique

Please review the:

[learning objective] or [training agenda] or [policy memo] or [invitation to quote for GeBiz] or [grant application] or [email to citizens]

And:

- 1. Approve or reject**
- 2. If reject, state reason for rejection**
- 3. If reject, modify it to make it acceptable**

Application: service critique examples

Review the video of the customer agent x interaction with a customer

1. Rank order the top three things they did well
2. Rank order the top three things could do better
3. How would you train the to respond to the question X given by the customer?
 - a) this
 - b) that
 - c) something else

Application: create example

The Civil Service College will be launching a new training on how to use data analytics and technology to enhance training outcomes and reduce cost.

Draft a learning objective for this new training
