

Powerful Crane Hire Software

Key Functionalities

Return on Investment Reporting

Comprehensive for data reporting and business analysis. Availability of assets, full historical documentation, performance with key live information.

Mobile Apps

Manage deliveries of cranes, inspections and paperless time sheets.

Time Sheet Billing

Bill customers for the machine and operator at an hourly rate with different rates for standard, standby, overtime and travel. You'll never miss-charge for rentals.

Forward Planning

Carry out multiple future bookings for the same piece of equipment, checking clashes and scheduled service and repairs, ensuring maximum utilisation of your machinery.

Automatic and Scheduled Servicing

Schedule services and set reminders against equipment, ensuring safety inspections and warranty expiry dates are never missed, meaning the equipment is ready for the next hire.

Accessories

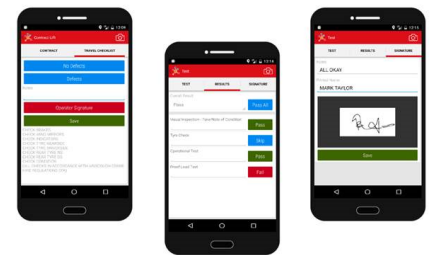

Attach accessories and safety equipment, allowing you to monitor all kit and operate more efficiently.

Test Certificates

Test Certificates can be created, attached to equipment records and printed out. Full historical safety information is available, ensuring equipment is legally compliant at all times.
