ABOUT ME

Sativa-Dominant Hybrid

Breeder: Swerve

CANNABINOID PROFILE

Please see batch testing data

PREDOMINANT TERPENES

Nerolidol beta-Caryophyllene d-Limonene

DESCRIPTION

SFV OG is a sativa-dominant hybrid that is great for patients who need strong pain relief but don't want to be stuck on the couch. As the name indicates, this OG Kush relative originates from California's San Fernando Valley. Leading with aromatic notes of earthy pine and lemon, its body effects take a little longer to feel than the initial head haziness.

PARENT #1: OG Kush

Hybrid

Breeder: Unknown/Disputed

Lineage: Unknown

OG Kush is the backbone of many strains we know and love today. Its genetic origins are quite a mystery and highly debated. There are also a number of different "OG Kush" phenotypes including: Larry, Tahoe, SFV, Ghost, Tripple, Abusive, Private Reserve, Apothecary, Diablo, Raskal, Poison and more. Given its unknown lineage, it hard to pinpoint what would be the "original OG Kush".
