Cutting Through the Buzzword: What Does IIoT Mean for My Business and How Can I Leverage It?

1940s

As the sting of the Great Depression faded and the economy started to bounce back, the early 1940s marked the beginning of WWII. The attack on Pearl Harbor in 1941 changed the course of many American businesses. Our founders were now tasked with coming up with a new plan to keep the business up and running in a time of war.

100 Years of Setting the Standard
1919 - 2019

ABB ACS380

Persistent and adaptable performance

The ACS380 machinery drive is part of ABB's all-compatible drives portfolio designed to offer not only a technically compatible drive, but an all-compatible solution for people, process, business, and environmental goals.

Benefits include:

- Simple to select and install
- Simple to commission and use
- Reliable and consistent high quality
- Reducing life cycle costs

SynergEX PANELBOARDS

Easy access, lower risk, and less downtime

Crouse-Hinds series

One of the biggest challenges with enclosures located in hazardous areas is accessibility. The SynergEX panelboard by Eaton's Crouse-Hinds Division utilizes individually encapsulated circuit breakers and a fully encapsulated chassis to reduce downtime, increase safety, and lower maintenance costs in hazardous locations.

Features and benefits:

- Multiple product designs and options
- Save time and money
- Unparalleled safety
- Lightweight and compact main breaker

3VA UL MOLDED CASE CIRCUIT BREAKERS

One system. A variety of applications.

SIEMENS

Requirements are increasing for cost-effective and energy-efficient operation of the electrical power distribution. Whether in industrial applications or buildings, Siemens new 3VA molded case circuit breaker offers safe, efficient and variable application options for low-voltage and medium-voltage power distribution.

Highlights include:

- Modular, well thought-out, highly variable system
- Easy integration into energy management and automation systems
- Integrated measuring function with the ETU 8-series
- Simple, efficient monitoring
- Numerous communication options available via standard bus systems

inSIGHT DATA MONITORING

Monitor critical performance indicators

Wiring Devices-Kellems

Data collection and analytics in today's market are increasingly important to ensuring efficiency, uptime, and quality. For any industrial manufacturer or data center owner, the ability to predict costly downtime before it happens is critical to maintaining productivity.

The Hubbell inSIGHT™ Data Monitoring line includes:

- Pin and sleeve devices
- Ethernet gateways
- Smart power cables
- Circuit and Environmental Monitors
- Software (cloud-based or local packages)

GRACESENSE PREDICTIVE MAINTENANCE

Revolutionize production and profits with IIoT

The field-proven GraceSense™ Predictive Maintenance System is a suite of smart devices that utilize low-power wireless sensor technology. Advanced data analytics provide asset managers with deep insights to machine health to effectively prioritize resources and maximize the value of their maintenance spend.

System Overview:

- Vibration and Temperature Node
- Panel-Mount Mode or Cloudgate
- Hot Spot Monitor
- Maintenance Hub

LITTELFUSE MROplus

Industrial Fuse Consolidation Program

In the Littelfuse exclusive MROplus™ program, their Technical Support Group analyzes a fuse inventory list and generates detailed reports to ensure the best circuit protection is being used.

What can MROplus™ do for you?

- Lower costs
- Increase plant safety
- Decreased downtime
- Reduce inventory
