MERSEN SURGE PROTECTION SOLUTIONS
Meeting the world's toughest standards

MERSEN

Down machines cost you time, money, and resources to get back online. With a minimal investment, you can protect your sensitive control equipment or your entire facility from surge events. Mersen's Surge-Trap® product line offers a world-class suite of surge protection products designed to protect your facility from harmful and preventable surge damage.

Why Mersen?

- Thermal Metal Oxide Varistor (MOV) protection
- Overvoltage is solely managed by TPMOV technology
- Prevention protection method
- Industry innovation
- Highest short-circuit current rating

- Isolated MOV

RITTAL WALLMOUNT ENCLOSURES
A good thing just got better

RITTAL

Control and operation systems become integral to driving efficiency and productivity. Industrial enclosures act much like a safe or strongbox to mount and protect these systems. Rittal understands these needs and has engineered compact enclosure systems that are flexible enough to expand, adapt, and integrate easily with diverse manufacturing environments.

Rittal Wallmount enclosures differentiate themselves by:

- Featuring a stylish, modern design that safely houses more components in a smaller space
- Boasting a multi-fold, single-piece body construction for outstanding strength and stability with fewer welds
- Including a zinc plated, depth adjustable mounting panel with increased surface area for mounting equipment

DA10D and DA30D DATA STATIONS
Harness the power of connectivity

RL RED LION

The benefits of end-to-end connectedness are clear. From the plant floor to the front office, act on real-time data from virtually any equipment, anywhere, anytime with the DA30D data station.

Powerful integration capabilities:

- Built-in MQTT Connectors
- Embedded OPC UA Server
- Optional SQL Queries
