

G120X with Ethernet I/P “X” Means X-tra Simple

This 30 minute webinar will review the new frequency converter SINAMICS G120X from the proven SINAMICS family of drives. Attendees will leave with a better understanding of configuration of the SIMANICS G120X VFD for communication with the Ethernet I/P based PLC. If you are a Controls Engineer or a Service Technician working with Siemens VFDs this class is ideal for you. There will be time for a Q&A session after the webinar to answer any questions you may have on the topics discussed.
