How Wireless Pushbuttons and Wireless Limit Switches Can Lower Your Total Cost of Ownership

This 30 minute webinar will cover how wireless technology not only eliminates the need to manually install cables, conduit and cable tray, but it improves the flexibility and speed of deployment saving time and money.

Topics that will be discussed:

- How Schneider Electric's XB5R wireless pushbuttons are unique in the marketplace
- What type of savings can be achieved through implementing a wireless solution
- How the wireless mesh technology works
- Different varieties of wireless technologies, the strengths and weaknesses

This webinar will include instructional information and a demonstration of the topics presented.
