

Once Your VFD Is Functional, How Do You Incorporate Safety Activation From This Controller? It's Easier Than You Think!

This 30 minute webinar will cover the configuration of STO in a G120 VFD via PROFISAFE over PROFINET. Previous knowledge of PLCs and Drives is a plus.

Topics that will be discussed:

- Review previous lab for understanding of control
- Selection of preconfigured Siemens Safety Telegram 30
- Retrieving, opening, and using the Safety Block and data types
- Connecting the block to the drive

Presented by:
Todd Mogensen
