

Standard Electric Supply Co. and ABB present

BASICS OF HARMONICS

WEBINAR

WHEN:

Thursday, May 28

10:00AM - 11:00AM

CLICK TO REGISTER

Learn how current harmonics produced by electrical equipment can distort power in an entire facility. Effects can include nuisance tripping, lighting issues, UPS failures, generator faults, and other electrical-related issues.

- Find out how harmonics change with load
- Learn how to measure them
- How do harmonics impact other plant equipment
