

SYSTEMATIC TECHNOLOGY

Standard Electric Supply Co. and Lutze present

LUTZE AirSTREAM Wiring System vs. A Traditional Back Panel

This webinar will provide an introduction on a new and improved way on how to manage and wire your control products within your control enclosure as well as provide improved air flow around your components. During this webinar you will learn about:

- Improved component management
- Improved wiring management
- Enhanced thermal management
- Enhanced utilization of enclosure space

You will leave with a keen understanding on a new method on how to manage control products within your control enclosure as well as improved thermal management.
