

Reduce Assembly Labor, Gain Space, and Improve Thermal Efficiency in Your Panel Design

This 30 minute webinar will introduce the LUTZE AirSTREAM wiring system for improving your panel design.

Topics that will be discussed:

- Improved panel wiring efficiency
- Improved wiring management
- Enhanced thermal management
- Enhanced utilization of enclosure space

Attendees will leave with a keen understanding of this new method of panel design to reduce assembly time, and improve thermal management. If you are an Electrical Engineer, Designer, or Technician involved with control panel layouts, this class is ideal for you.
