

COST OUT

We identify and implement cost out solutions that are tailored to your organization

Our cost out approach involves all disciplines in the value chain. This way we help you create products with the best possible return on investment.

This means that not only the procurement but also the manufacturing, R&D and operation & maintenance departments are involved when identifying the total cost down opportunities.

We will put together the right cost out team of experts to meet your requirements and help you increase your competitiveness and lower your costs.

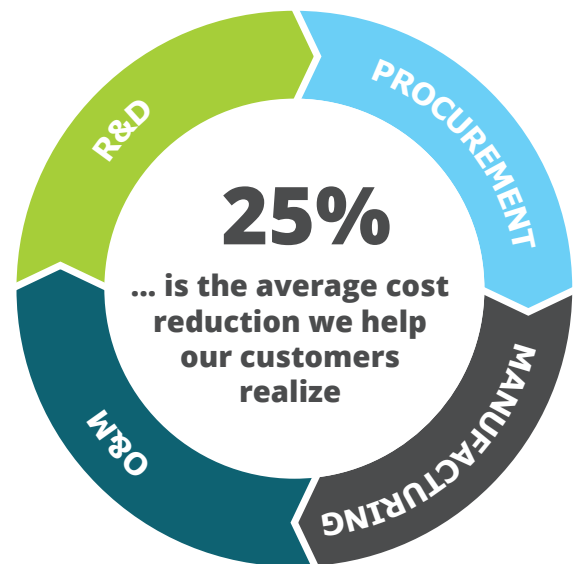

THE PROCESS

All cost out projects are executed in close cooperation between the customer and DIS/CREADIS.

We have the ownership of the whole process from the ideas to the implementation of the cost out activities.

A DIS/CREADIS cost out project is done in four phases: Analysis, Challenge, Conceptualization & Implementation.

The four phases are built on many years of helping our customers in understanding, developing and utilizing technology in a cost-efficient manner.

WHY WORK WITH COST OUT

- Increase your competitiveness
- Update your products with the latest cost-efficient technologies
- Ensure a better return on your investments
- Reduce the lead time on your products
- Increase your margins
- Reduce maintenance risks
