

# IronDome Collective Defense

See an attack *before* it hits

## The future of cyber threats

IronDome

### PRODUCT BENEFITS AT A GLANCE

#### Reduce impact of an attack

Analyzes anonymized participant data to identify stealthy, sophisticated threats that otherwise may be missed by an individual enterprise.

#### Gain visibility across the threat landscape

Provides real-time visibility of cyber threats targeting supply chains, industries, regions, or any custom Collective Defense grouping.

#### Increase effectiveness of existing SOC resources

Receives collective threat intelligence that provides immediate context into urgent threats, enabling you to prioritize threats and build a proactive defense.

IronDome is the first automated cyber [Collective Defense solution](#) that delivers threat knowledge and intelligence across industries at machine speed. With [IronDome](#), your organization can collaborate with others across industries and sectors to stay ahead of evolving threats through real-time threat sharing.

#### Meeting the challenge

Cyber threats are evolving exponentially. Attacks are increasing faster than most organizations can manage alone. IronNet was founded to change the way organizations think about security, building a broad coalition that can work together to stay ahead of threats and threat actors. The IronDome solution facilitates Collective Defense to deliver the unique ability to automate real-time knowledge sharing and collaboration between and beyond sectors for faster threat detection. Now, you can build a stronger cyber defense that can scale by anonymously collaborating with others in real-time.

#### For CISOs

You can't defend what you can't see. IronDome is your window into your threat landscape to help you identify and close detection gaps, enabling your security teams to prioritize resources to defend against real—not theoretical—cyber threats targeting your company, industry, or region.

#### For SOC analysts

IronDome connects peers in real time. Collective Defense allows you to securely and anonymously share threat context, prevalence, and expert commentary about how to triage. This capability allows analysts to make informed decisions quickly, reducing mean-time-to-response.

## WHY WE CHOSE IRONDOME

"The value proposition associated with the Dome is not just about Con Edison. It's about the entire sector — and other sectors — that are at risk from a cyberattack. Understanding what's going on in those networks compared to ours makes us collectively stronger and better able to mitigate those risks."

- Manny Cancel,  
former VP and CIO of Con Edison

## ABOUT IRONNET

IronNet is a global cybersecurity leader that is revolutionizing how organizations secure their enterprises by delivering the first-ever Collective Defense solution operating at scale. Our solutions leverage our unique offensive and defensive cyber experience to deliver advanced behavioral analysis and collective intelligence to detect known and unknown threats.

## Key capabilities

### Faster detection and response

IronDome delivers the unique ability to automate real-time, anonymous knowledge sharing and collaboration between and beyond sectors for faster threat detection. Advanced behavioral analysis at the IronDome level enables detection of unknown or stealthy threats targeting your business ecosystem, industry, region, or custom IronDome Collective Defense group.

### Real-time visibility to threat landscape

Real-time, machine-speed sharing between large and small enterprise peers quickly reveals detected anomalies across all stages of the Cyber Kill Chain in situational context. With such instant visibility, security teams can triage and respond quickly to mitigate otherwise unknown attacks targeting their enterprises and the broader Collective Defense community.

### Visibility across cloud, multi-cloud, and business ecosystems

IronDome works through IronDefense to deliver a singular view of your network infrastructure across cloud, hybrid, and on-premise networks.

### Instant collaboration with fellow defenders

Automatic sharing of investigation notes and triage outcomes helps optimize security response and increases defensive economies of scale across all IronDome members.

### Proven expertise for the Collective Defense of your organization

IronNet partners with all customers to deliver a personalized experience to help your security team plan, implement, integrate, and operate IronNet solutions in your enterprise. Our highly skilled industry experts with deep commercial, military, and intelligence experience will work with you every step of the way to deliver measurable improvements to detect network-based threats across your enterprise.

## Experience IronDome

Thinking about IronNet's advanced threat protection? Regardless of your industry or company size, the proof is within reach. A 30-day, remote [Proof-of-Value \(PoV\)](#) will give your organization insights into how IronNet can improve your cyber defenses.
