PERSONAL LEADERSHIP

Analytical Thinking and Problem Solving

The significance of analytical thinking is depicted in Einstein's quote "The important thing is not to stop questioning". The ability to question, think critically and make decisions are quintessential of a leader.

This program increases the ability to analyze problems using various frameworks and to solve complex problems creatively.

Participants are also equipped with the skill of persuasion to garner support from stakeholders, increasing the chances of buy-in necessary for solution implementation.

Learning Outcomes:

By attending this workshop, learners will be able to:

- Be aware of your own foundation in terms of analytical thinking
- Apply analytical thinking tools effectively at workplace
- Set the right problem-solving mindsets
- Define challenges and generate ideas
- Gathering support to implement ideas

TRAINER PROFILE

DANIEL LEE

Daniel specialized in leadership and thinking subjects that brought him to 7 countries in Asia, namely, Malaysia, Hong Kong, Singapore, Indonesia, Thailand, Vietnam and Philippines. He has recently pivoted and trained many online sessions including one with more than 1200 logins across Asia, Middle East and Africa. Prior to his 14 years in the learning and development industry, Daniel was a lawyer for 7 years specializing in commercial and corporate litigation. One of the major milestones in Daniel's life was his opportunity to meet Tony Buzan (Legendary inventor of the Mind Map), where he was being certified as a ThinkBuzan Licensed Instructor. All these have already been translated to better thinking and strategies for Daniel's clients in the corporate sectors.

Daniel also started a YouTube Channel with "18 Personal Development Tips" that attracted thousands of views (clips based on 2 published books he authored ie. "Success, Money and Passion" and "8 Success Qualities of Outstanding People").

He is also a certified Korn Ferry (Lominger) Leadership Architect 101 Consultant that uses a global competency framework that helps leaders to be developed effectively.
