

A Breakdown of LicenseCheck

What does it do for you?

Tracking

Track and check credentials for licensed professionals before and after they have been hired. Access full licensure histories of your team to ensure you remain in compliance.

Auditing

Get quick confirmation your subjects hold the licenses they claim. Notification is provided for any questionable outcomes. Acquire PDF or platform-based records showing your due diligence.

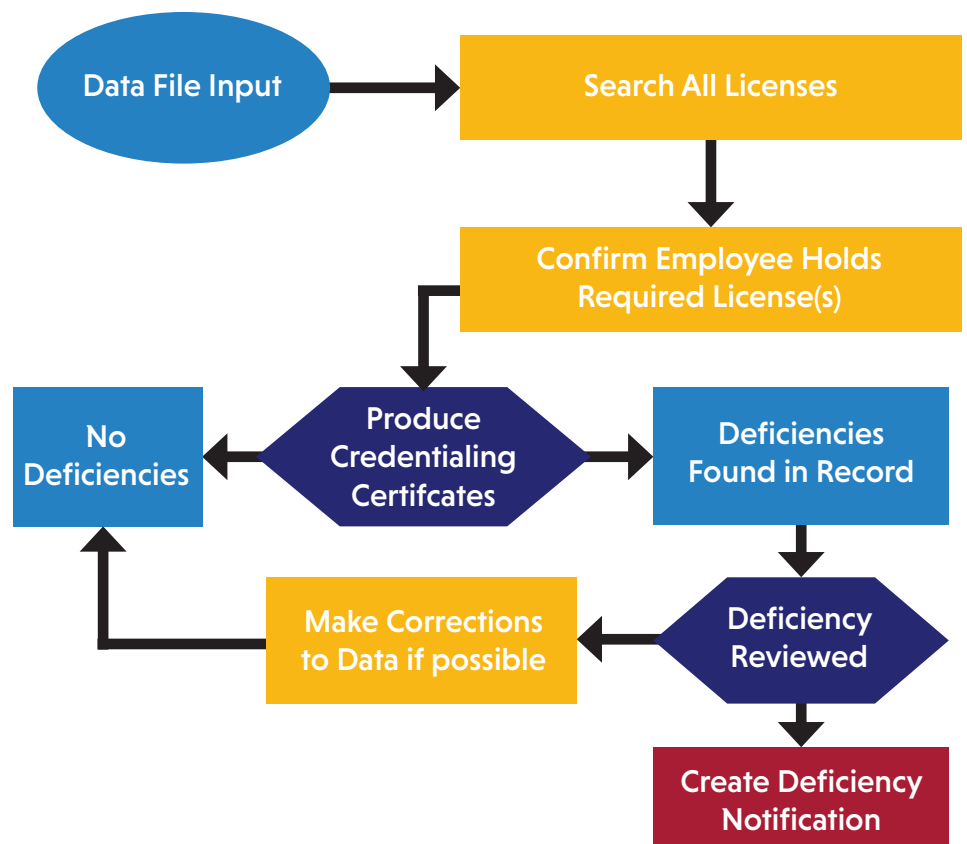

Monitoring

Set up a system of ongoing licensure monitoring with notifications months before an upcoming expiration date. Integrate other systems with LicenseCheck to create powerful partnerships.

Benefits

- 1 Primary Source Verifications
- 2 License expiration and renewal notifications
- 3 Compliance with the latest CMS, JCAHO, and OIG standards
- 4 Dedicated Account Team for support and training
- 5 On-Demand easy-to-read reporting.

Our Process

A Breakdown of License Check?

The Process Explained

1. ComplianceLine receives the necessary metadata in the appropriate format.
2. We cross check the data against previously delivered data sets and other sources (such as NPI) to validate, correct, and complete the dataset.
3. The metadata is automatically scanned against the databases with which we have API integration.
4. Our Team of Investigators check each provider against multiple primary source databases and record the results.
5. All results and findings are consolidated into an easy-to-understand report and delivered to the client via the SanctionCheck platform or PDF.
6. The client is notified of any "Red Flag" findings such as expired, revoked, or suspended licenses.
7. All historical search data is stored for future reporting through the SanctionCheck platform.

The Ongoing Process
