

Document Management

Upload any file and associate it to trucks, trailers, drivers and sites.

Document Management, the new feature update within The LogisticsFramework™, is our latest initiative to ensure ease-of-use when utilizing Qv21 during your day-to day. With this, you will be able to:

Direct Roadside Access To

- Current insurance documents for equipment
- Current registration documents
- Special permits
- Medical cards
- CDL

- Access files from the Qv21 mobile app
- Assign files to any entity from the desktop platform
- Locate previously uploaded documents leveraging basic search parameters
- Upload several files at once with Bulk Upload
- Load all your insurance policies and assign to the specific asset/driver/trailer.
- Assign 'Valid From' and 'Valid To' dates for expiring documents
- Track documents that are 2-weeks out from expiring with a yellow timer
- Identify expired documents with a red timer
- User-friendly interface on Driver Handsets for simple accessibility
- Files for the driver will appear when the driver logs in, as well as truck, trailer and any site they are scheduled for pick up and drop off.

To access this new feature, simply navigate to [Tools > Manage Documents](#)
