Dump Your Business Barriers, Start Fresh With Our TMS

In this industry, you are constantly throwing things away. However, are you aware that there are valuable resources you throw away when you operate without a transportation management system (TMS)? Resources like money, time, accuracy, security, compatibility, and data?

It's easy to let work pile up so high that you lose sight of these factors, but they shouldn't be overlooked. Take a load off and get back to the real work while we tackle your dirty work: transportation management.

Qv21 is the industry-leading TMS for short-haul, bulk commodity trucking companies. We've been a sustainable, cost-effective technology partner to some of the nation's largest transfer waste haulers helping them transform their dispatch and field operations, as well as their back-office teams. We take great pride in being able to work with any customer, regardless of how they haul. Waste Haulers like you are navigating their operations with our system, The LogisticsFramework™, and its insights.

We make it simple for you to save money, increase efficiency, and remove barriers to your waste hauling operation.

What are you throwing away when you don't use a TMS?

Money

Our TMS optimizes everything, providing max ROI and opportunities to scale your efforts daily

Time

Time is of the essence, so we provide real-time visibility to keep your team updated, connected, and efficient

Accuracy

Instant data means instant insight to make informed, accurate decisions about your trucks, drivers, loads, and more

Security

Secure SaaS products like ours ensures a protected operation and a safe way to store all your data

Compatibility

Our TMS is designed for the short-haul, bulk commodity space, seamlessly connecting to any operation blueprint

Data

With everything collected at the source and stored in the cloud, you'll never have to worry about lost data
