

# With Qv21, Stability Comes Standard

Experiencing downtime with your current TMS or ELD solution? Maybe it's time to make the switch to the most stable platform in the industry. With our **99.995% uptime** over the last 24 months, we measure downtime in minutes and seconds, while the competition measures it in hours and days.

We've been providing service to our partners for a while now so you can say goodbye to fly-by-night startups and growing pains when you sign up with Qv21. With over a decade of fleet logistics experience and expertise, we know what works and what doesn't for hauling commodities. Another company may say they're better, but we've proven it with our longevity in the industry.

## Qv21 Quick Stats
