

Cultura Modernizes Its Flagship Product

Cultura success story using PlatformPlus

The Challenge.

Existing:

Cultura's customers demanded a modern technology stack to enable third-party system integration and business intelligence.

Required:

Updating Agris, Cultura's flagship product, to support MS SQL Server in addition to the original Pervasive database.

The Approach.

Cultura worked with the Modularis IP Builder solutions to set a course and establish the design before developing the new system using Accelerator.

Modularis IP Builder

PLUS OUR
Advisory Team Oversight

The Outcome.

In addition to being on-time, on budget and in-scope the new Agris on SQL product achieved the following:

Unlocked further system integration for Cultura's enterprise customers.

Updated Cultura's 20+ year old product to use the latest in database technology.

ROI achieved in 6 months.

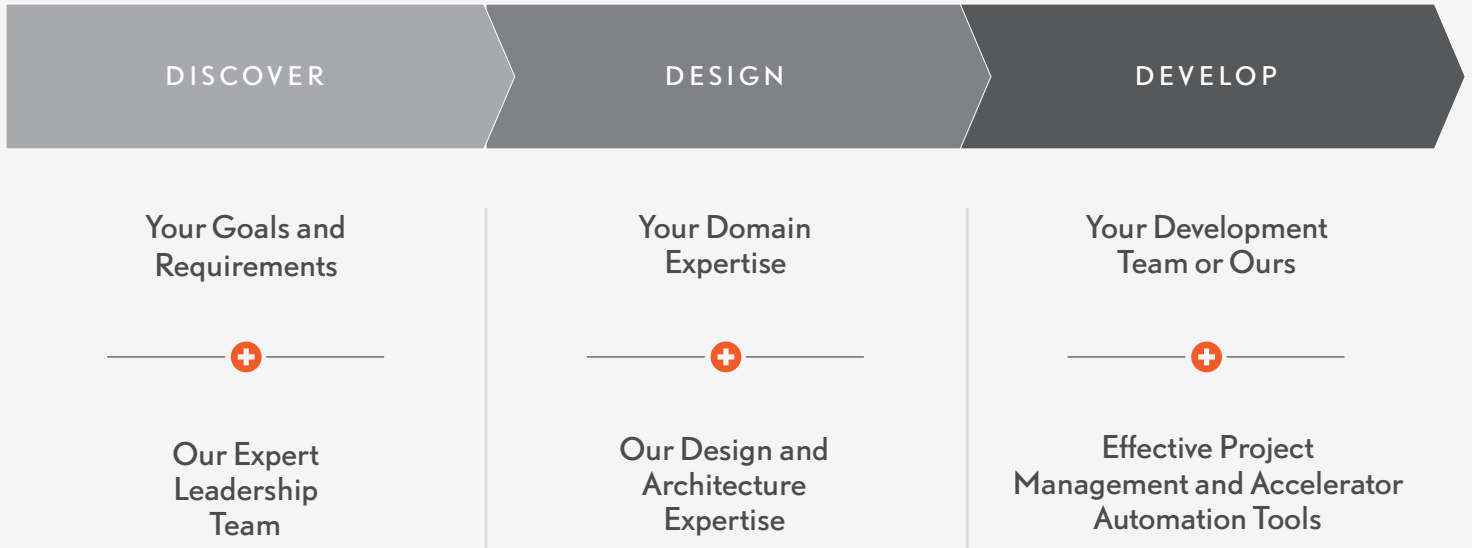

"Modularis PlatformPlus enabled us to find new ways of adding value to our customers' existing Cultura software assets."
