

SmartWitness Creates an IoT Platform for Global Fleet Management

SmartWitness success story using PlatformPlus

The Challenge.

Existing:

SmartWitness designs and creates innovative IoT devices for fleet management – but lacked a data management system.

Required:

A platform to manage video, audio, and telematics data for vehicle fleets around the world – that's flexible and easy to maintain.

The Approach.

SmartWitness worked with the Modularis Advisory Team to set a course and establish the design before developing the new platform using Accelerator.

Technology Roadmap Session

1 WEEK
with Executive Team

Product Design Session

1 WEEK

Modularis IP Builder

PLUS OUR
Advisory Team Oversight

The Outcome.

In addition to being on-time, on budget and in-scope the new SmartWitness Platform achieved the following:

Thousands of vehicles are now connected, increasing professional drivers' safety.

SmartWitness extended their business and enabled a recurring revenue stream with their new cloud offering.

ROI achieved in 6 months.

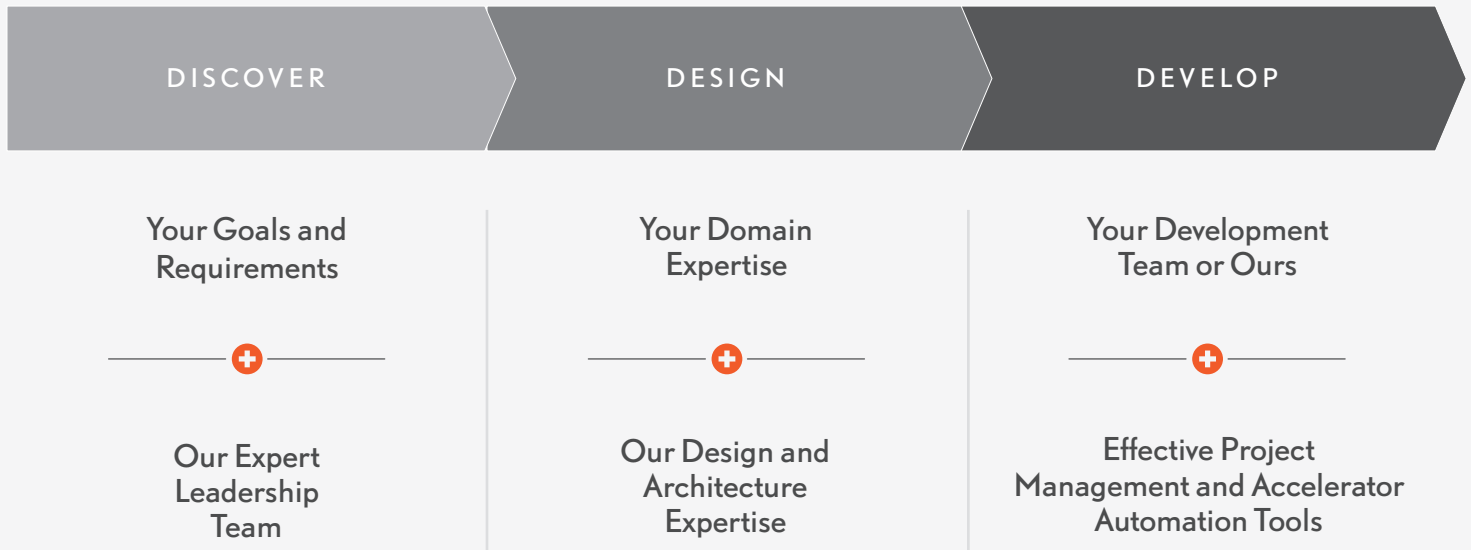

"Modularis PlatformPlus enabled us to provide a global IoT platform to connect fleets and improve road safety around the world."
