

ADVANCED FIND QUERY

QUICK AND EASY DATA SEARCH CAPABILITIES

DO YOU STRUGGLE TO FIND THE DATA YOU NEED?

We've all been there. When it comes to searching for key information within an online database, nothing is more annoying than being told that the info can't be found — especially when you know full well it's in there and ready to access if you can only type in the right combination of magical keywords.

The true nature of your business lies within the smallest details and trends, and the only way to get to them is by slicing and dicing your data into pieces. It's possible with Gravity Software™ and Microsoft Dynamics 365's highly intuitive search engine called "Advanced Find Query".

Ready to take the next steps?

Simplify your teams productivity and provide your business with the platform needed to grow.

Features

Global and Relevance Search

- Quickly and easily bring up a wide range of information with just a few keystrokes
- Delivers fast and comprehensive results across multiple entities in a single list, sorted by relevance
- Utilizes a dedicated search service powered by Azure to boost search performance
- Configured to search across 10 or more categories of information at once
- Specify the order in which the retrieved information will be presented to you

Advanced Find

- Zero in on the exact data you're seeking by narrowing your search to a few relevant parameters
- Instantly save, export or share advanced finds without the extra steps of cutting and pasting, copying or printing
