

8 ways

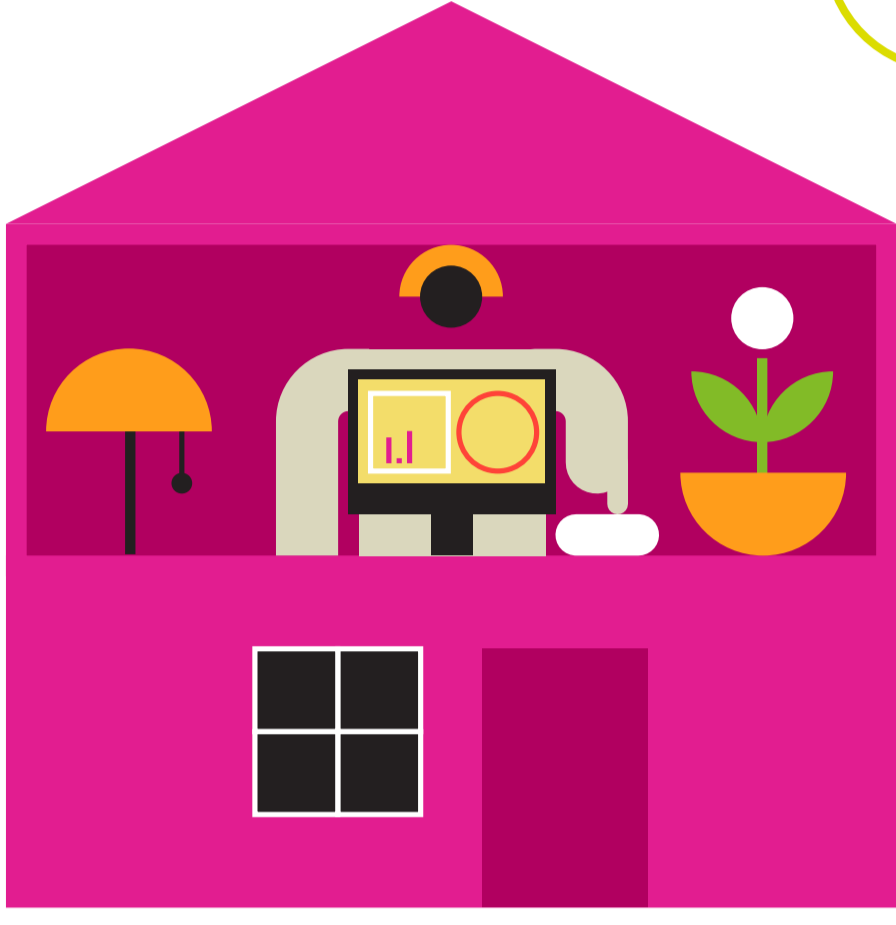

to give your business the IT flexibility it needs with Swizznet

To meet increasing customer demands, your organization could benefit by moving to an always-connected workplace. Swizznet offers an extensive range of hosting solutions that provide your employees with seamless, secure access to all of the apps and data they need to get their job done. Here's just a few reasons why you should work with Swizznet:

1. Enable cost-effective IT

Let us handle the day-to-day details. You stay focused on your business. Better yet, we'll deliver your apps and desktops globally from the cloud and eliminate the capital expenses of maintaining your own datacenter.

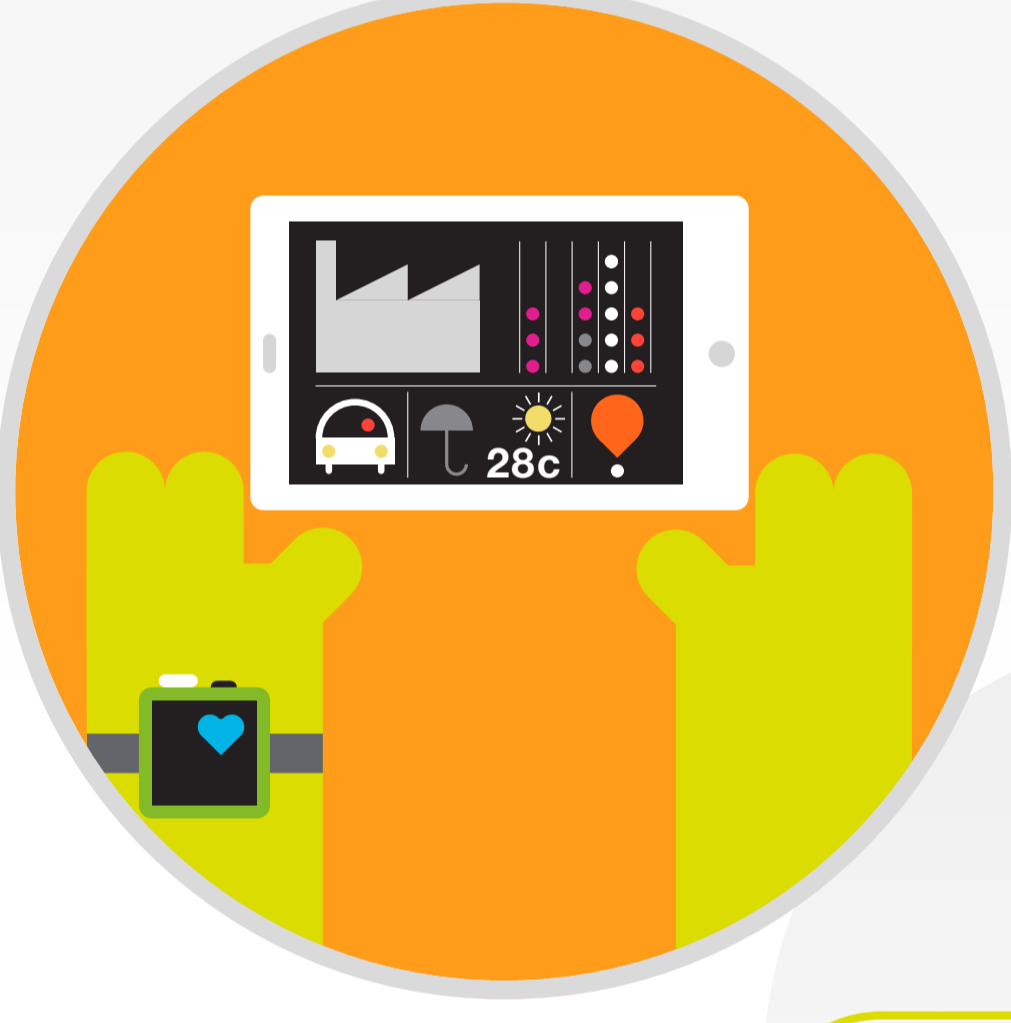

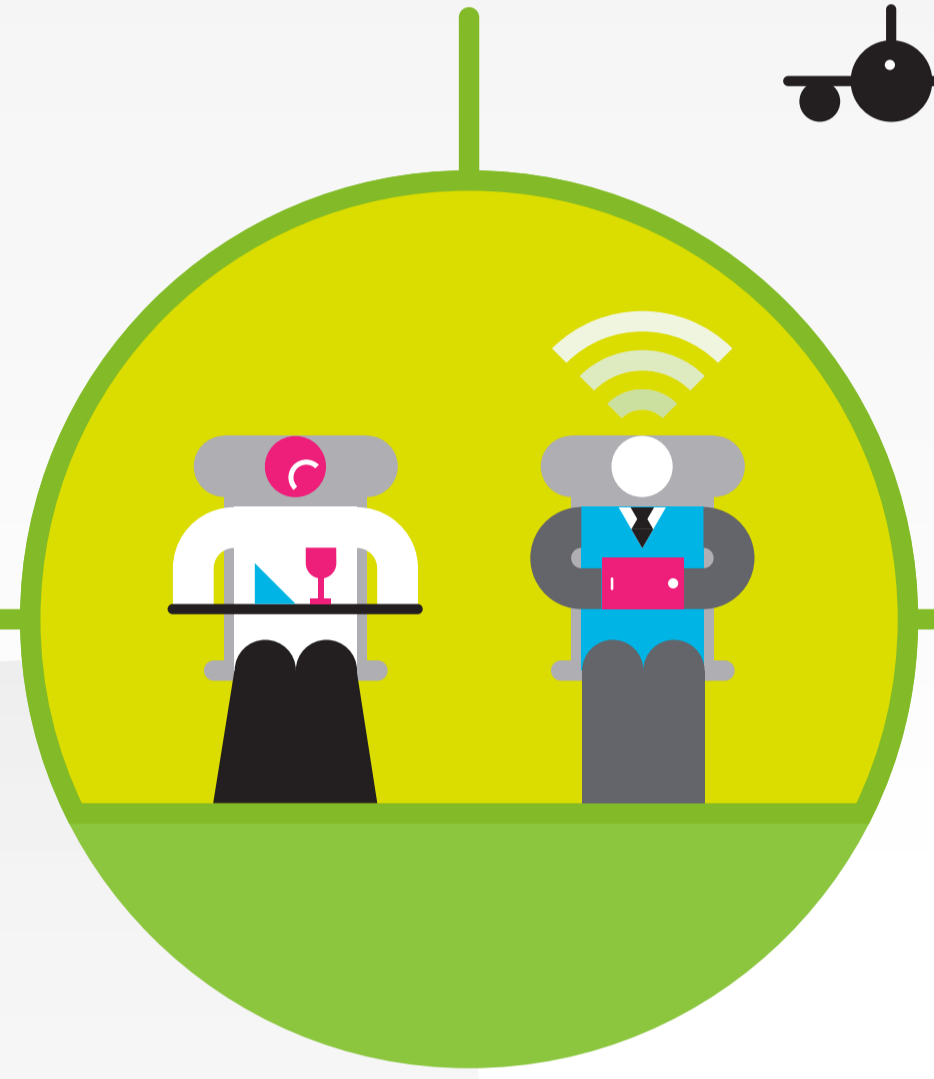

2. Provide desktops to remote or temp employees

Need fast onboarding? We can rapidly provision Windows apps and desktops for remote contractors or seasonal workers and easily shut them down when not in use.

3. Access work from any device

Your employees can access their desktop from any HTML5-capable browser or via a small downloadable application, enabling them to work on an iPad, tablet, Chromebook, laptop, desktop or thin client—whatever device they prefer.

4. Deliver great user experiences

Employees will enjoy a high-definition experience at work, home or anywhere else they do business. Using our services, you can deliver graphic-intensive applications or intelligent desktop workspaces side by side, giving your people the right capabilities for the right occasion.

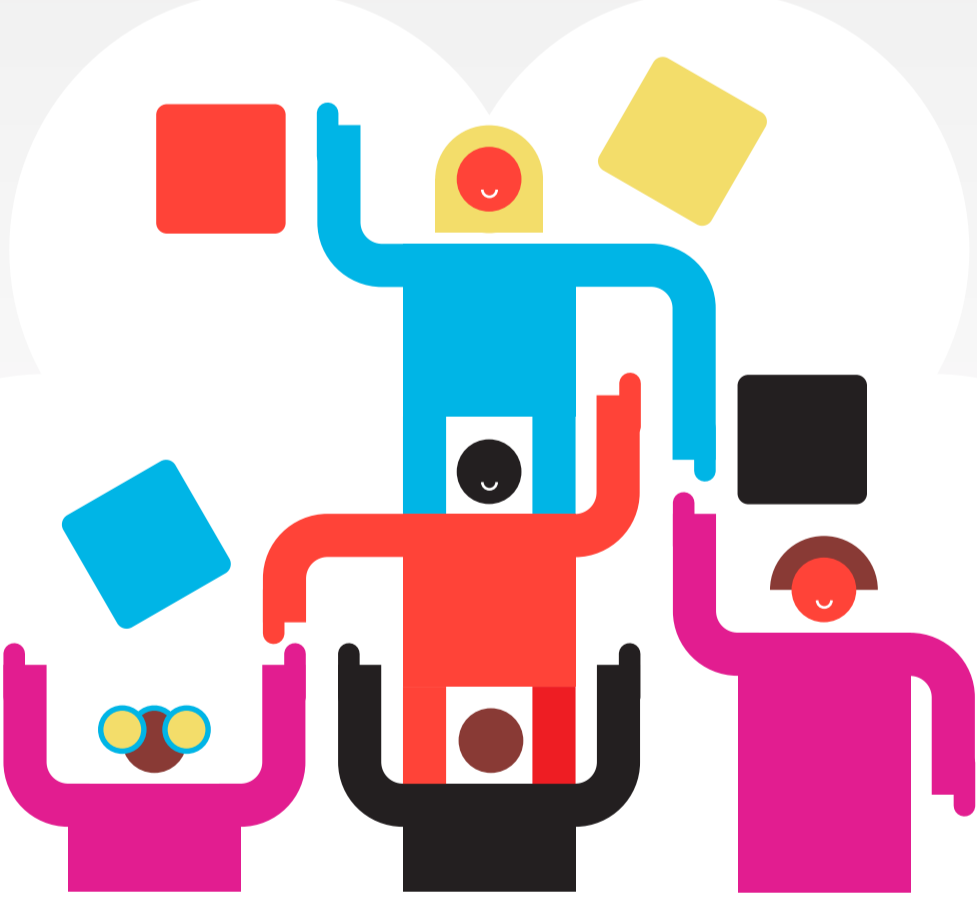

5. Improve security and compliance

With desktops delivered virtually, you can eliminate any concerns about data loss or theft because your sensitive information is stored in the cloud, not on the device.

6. Enable business continuity during unexpected events

During sudden disruptions or emergency situations, we can scale up desktops in minutes without the additional CapEx expenses and, if needed, even support a completely remote workforce.

7. Centralize and simplify IT services

No more in-house IT fire drills and unexpected expenses. We can seamlessly manage everything your team needs. From desktop provisioning to contextual access control to IT help desk support, we've got you covered.

8. Enhance Microsoft capabilities for greater productivity

As a Citrix Service Provider Partner, we can bring additional value to your Microsoft solutions. From modernizing desktop environments to providing valuable productivity options to boosting network security, we can deliver the apps and tools your employees need to get the job done.

Discover how Swizznet can become the trusted partner you need to keep your business running smoothly, now and in the future. Contact us today at: 888-794-9948

Swizznet is the premier hosting solution provider for QuickBooks®. Our enterprise hosted accounting services provide anytime access to the full desktop software but with all the benefits of the cloud at a lower cost than on-premise! You can bring all of your business applications to the cloud and enjoy the option to deploy on world-class Microsoft Azure, Google Cloud or INAP infrastructure. All our services are backed by our 24/7/365, US-based Obsessive Support® team and unparalleled cloud platform.
