

An enterprise level, integrated solution that features leading-edge IT management, cybersecurity and cloud-hosted services so that small- and medium-sized businesses can compete successfully and grow.

## Accelerating Efficiency & Growth

Swizznet understands that a secure and sophisticated technology backbone is essential for businesses that want to serve clients well and grow their businesses. More than just a private cloud environment or end device management, **SwizzStack** is an efficient and flexible platform that optimizes work flow and reduces the risk of security breaches by protecting access to data with customized and enforceable cybersecurity policies.

### SwizzStack

- » Addresses for hardware, software, and external security challenges in a single source solution.
- » Provides technology management support that scales to each organization's operational needs, not the other way around.
- » Adapts to each company's needs, customized to support unique business goals and security priorities.
- » Enhances productivity in a secure environment that offers flexibility, access management, data protection, and cybersecurity compliance.

## Why Choose **SwizzStack**?

**Security and Compliance:**  
Generates and archives logs of application, data access, account activity and audit information.

**Flexible Operating Environment:**  
Combines the advantages of centralized and decentralized computer network architecture in one secure and efficient solution.

**Productivity and Speed:**  
Offers leading cybersecurity technology solutions, custom designed and following best practices to meet the strictest regulatory standards.

**Optimize Tech Spending:**  
Scales in a predictable manner with the growth of your firm and without hidden fees.

## Security and Flexibility

**SwizzStack** offers small and medium-sized businesses the most sophisticated and intelligent outsourced IT support solution for today's flexible workforce, without the overhead of an in-house IT department.
