

Looking Back To Move Forward

A company on the move, Taylor Corporation is committed to maintaining high standards of social and environmental responsibility. We will do this by serving as responsible managers of natural resources, being good corporate citizens and protecting the health and safety of our employees, clients and visitors. This commitment is expressed in our newest corporate value statement:

We will protect the environment and the quality of life of our colleagues, customers and community.

MEASURING OUR MOMENTUM

Each year, we analyze our data to plan sustainability-minded projects that increase efficiency and protect the environment. Taylor Corporation's momentum in this area is clearly visible in the metrics we track across the company to determine our baselines for future goals:

	RECYCLING* (tons)	WASTE (tons)	HAZARDOUS WASTE (tons)	WASTE TO ENERGY (tons)	RECYCLE RATE	DIVERSION RATE
2018	34,194	11,513	70.7	3,492	74.8%	82.5%
2019	40,973	10,375	61.9	3,923	79.8%	87.4%

In comparing the data for 2019 and 2018, we recycled more material, produced less non-recyclable and hazardous wastes, and we diverted more waste to waste-to-energy facilities. As a result, our recycle and diversion rates also increased. In fact:

- Four of Taylor's production facilities now divert 100% waste-to-energy.
- Sixteen of Taylor's production facilities are certified both by the Sustainable Forestry Initiative® (SFI®) and the Forestry Stewardship Council® (FSC®), another 11 are solely FSC-certified, and two additional sites are SFI-certified only. Twenty-nine total facilities had one or both certifications.
- Two facilities expect to receive ISO14001 certification in 2020.

*Recycling includes: paper, plastics, OCC, metals, electronics, yard waste and secure shred tonnage.

STRIVING FOR SUCCESS

Taylor Corporation encourages each business unit to pursue other environmental projects directly relevant to their customers and industry sector. These are three examples of how Taylor Communications* — the Taylor business unit dedicated to the production of products including forms, labels, secure communications, and signs and graphics — performed in 2019.

*Taylor Communications was the largest business unit under Taylor Corporation in 2019.

CARBON DISCLOSURE

CDP conducts an annual global supply chain survey to disclose the environmental impact of major corporations. Ratings are expressed in bands from A to D-, with an A being the highest level possible.

CDP Climate Disclosure Score

The quality and comprehensiveness of our business unit's response to the annual CDP climate change questionnaire:

Our 2019 Score **B**
Sector 2019 CDP Average* **C**

CDP Supplier Engagement Score

Our business unit's supplier management practices in regard to governance, targets and initiatives, and Scope 3 emissions:

Our 2019 Score **B-**
Sector 2019 CDP Average* **C**

CDP scores only apply to a limited number of site addresses

*Average of CDP respondents in Paper & Forestry sector across North America

WASTE REDUCTION

The Taylor business unit noted above recycled 14,125 tons of paper, cardboard, plastic and metals in 2019. This is how they performed against their own goals:

Diversion
Our 2019 goal **70%**
Actual performance **68.5%**

Recycling
Our 2019 goal **75%**
Actual performance **78.2%**

FORESTRY MANAGEMENT

Canopy, a not-for-profit environmental organization dedicated to protecting forests, species and climate, compiled its 2019 Blueline Ranking of North American printers' environmental practices. As a whole, this Taylor business unit ranked:

#2 in the U.S. Taylor Communications' 2019 Blueline Ranking
